STATE OF MARYLAND,
OFFICE OF THE STATE BOARD OF EDUCATION,
BALTIMORE, December 20, 1901.

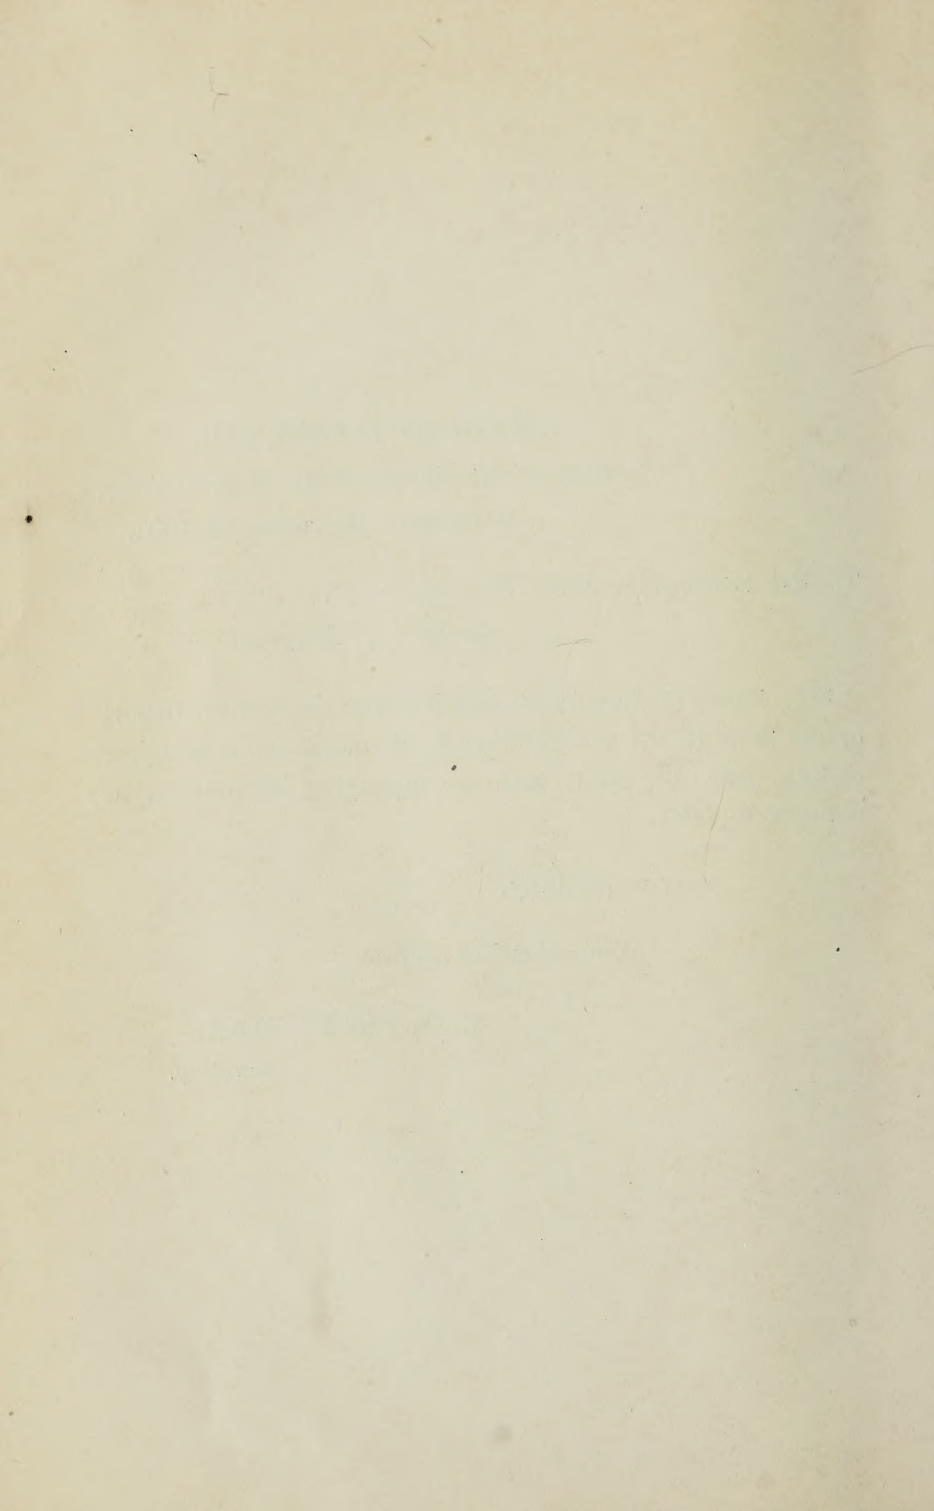

TO HIS EXCELLENCY JOHN WALTER SMITH,
Governor of Maryland:

Sir: I have the honor to transmit to you the Annual Report of the State Board of Education for the fiscal and school year ending July 31, 1901, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

E. B. PRETTYMAN,
Secretary.

REPORT

OF THE

State Board of Education.

SUMMARY.

The following summary, in connection with the accompanying tables, exhibits in a condensed form the most important facts connected with the administration of the public school system of the State for the fiscal and school year ending in the city of Baltimore December 31, 1900, and in the counties July 31, 1901.

The several items are compared with the corresponding items for 1899 in the city of Baltimore and for 1900 in the counties.

Number of schools in Baltimore city.....	178
“ “ the counties.....	2,357
Total.....	2,535
Being an increase in 1901 of	176
Number of different pupils, city.....	79,659
“ “ “ counties.....	144,345
Total....	224,004
Being an increase in 1901 of.....	1,631
Highest number in one term, city.....	64,720
“ “ “ counties.....	128,999
Total.....	193,719
Being a decrease in 1901 of.....	623

Average number in daily attendance, city.....	54,403
“ “ “ counties.....	81,112
Total.....	135,515
Being an increase in 1901 of.....	1,115
Number of teachers, city.....	1,676
“ “ counties.....	3,360
Total.....	5,036
Being an increase in 1901 of.....	80
Number of months schools were open, city.....	10
“ “ “ “ counties.....	8.5
Average for the State.....	9.5
Being an increase in 1901 of.....	.2 of a month
Receipts from all sources, city.....	\$1,322,964 03
“ “ counties.....	1,469,063 13
Total.....	\$2,792,027 16
Being a decrease in 1901 of.....	\$359,696 69
Amount paid for teachers' salaries, city.....	\$1,081,991 45
“ “ “ counties.....	962,152 40
Total.....	\$2,044,143 85
Being a decrease in 1901 of.....	\$31,804.57
Amount paid for building, repairing and furnishing school houses, city.....	\$23,492 34
Amount paid for building, repairing and furnishing school houses, counties.....	104,053 56
Total.....	\$127,545 90
Being a decrease in 1901 of.....	\$197,802.70
Amount paid for books and stationery, city.....	\$23,749 90
“ “ “ “ counties.....	61,007 82
Total.....	\$84,757 72
Being a decrease in 1901 of.....	\$55,293.28
Amount paid for rent, fuel and other incidentals, city.....	\$71,201 70
“ “ “ “ counties.....	92,661 55
Total.....	\$163,863 25
Being an increase in 1901 of.....	\$11,241.96.
Total expenses for public school purposes, city.....	\$1,218,734 28
“ “ “ counties.....	1,469,063 13
Total.....	\$2 687,797 41
Being a decrease in 1901 of.....	\$335,711 20

Excluding the city of Baltimore, the county schools show the following results:

Number of schools.....	2,357
Increase in 1901 of.....	23
Total number of scholars enrolled.....	144,345
Increase in 1901 of.....	2,118
Highest number enrolled in one term.....	128,999
Decrease in 1901 of.....	44
Average number enrolled.....	116,327
Decrease in 1901 of.....	1,780
Average number in daily attendance.....	81,112
Increase in 1901 of.....	440
Number in first grade.....	37,807
Increase in 1901 of.....	458
Number in second grade.....	20,036
Decrease in 1901 of.....	1,264
Number in third grade.....	21,085
Increase in 1901 of.....	14
Number in fourth grade.....	19,030
Decrease in 1901 of.....	517
Number in fifth grade.....	14,459
Increase in 1901 of.....	98
Number in sixth grade.....	9,290
Increase in 1901 of.....	12
Number above sixth grade.....	6,363
Increase in 1901 of.....	248
Number studying bookkeeping.....	3,121
Increase in 1901 of.....	285
Number studying algebra.....	8,128
Increase in 1901 of.....	285
Number studying philosophy.....	3,990
Decrease in 1901 of.....	268
Number studying drawing.....	35,239
Increase in 1901 of.....	1,436
Number studying geometry.....	3,814
Increase in 1901 of.....	14

Number studying physiology.....	23,667
Decrease in 1901 of.....	1,487
Number studying Latin	2,678
Decrease in 1901 of.....	102
Number of teachers (including assistants), men—white, 921 ; colored, 225 ; total.....	1,146
Women—white, 2,439 ; colored, 388.....	2,827
Total.....	3,973
Average number of months schools were open.....	8.5
Amount received from State school tax (white schools), free school fund and academic donations.....	\$405,432 90
Increase in 1901 of.....	\$1,006 70
Amount received from State school tax appropriated to colored schools.....	\$11,114 56
Decrease in 1901.....	\$1,390
Amount received from county tax.....	\$666,526 86
Decrease in 1901 of	\$38,580 61
Amount paid for teacher's salaries.....	\$962,152 40
Decrease in 1901 of.....	\$1,238 27
Amount paid for building, repairing and furnishing school houses.....	\$104,053 56
Decrease in 1901 of... ..	\$24,980 07
Amount paid for books and stationery.....	\$61,007 82
Decrease in 1901 cf... ..	\$9,586 05
Amount paid for supervision and office expenses.....	\$44,838 41
Increase in 1901 of.....	\$1,158 06
Amount paid for incidental expenses, including rent and fuel... ..	\$92,661 55
Increase in 1901 of.....	\$5,160 21
Amount paid for interest.....	\$3,203 11
Decrease in 1901 of.....	\$2,044 66
Amount paid for miscellaneous expenses.....	\$62,845 60
Increase in 1901 cf... ..	\$20,128 39
Amount of indebtedness paid.....	\$53,879 81
Decrease in 1901 of ..	\$55,517 52

Total expenses for public school purposes in the counties.....	\$1,469,063 03
Decrease in 1901 of.....	\$92,975 68

The items which show an increase are:

Supervision and office expenses,....	\$ 1,158 06
Incidental expenses, rent and fuel.....	5,160 21
Miscellaneous.....	20,128 39
Total increase ..	<u>\$26,446 66</u>

The items which show a decrease are:

Teachers' salaries.....	\$ 1,238 27
Building, repairing and furnishing.	24,980 07
Books and stationery ..	9,586 05
Interest	2,044 66
Indebtedness paid.....	55,517 52
Total.....	<u>\$93,366 57</u>

Showing a net decrease of expenditures in 1901 of...\$66,919 91

STATE TABLES.

STATE TABLES.

The State tables annexed present the usual summary of interesting facts.

Table "A" shows the population of Maryland by counties and the number of white and colored, according to the census of 1900.

Table "B" shows the population between five and twenty and the quarterly distribution of the State school tax to the white schools of the several counties and the city of Baltimore.

Table "C" shows the colored population between five and twenty, and the quarterly distribution of the State school tax to colored schools of the several counties and the city of Baltimore.

Table "D" shows the assessed value of the property subject to taxation in the several counties, with the amounts, as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools," and the "County School Tax."

Table "E" shows receipts from all sources, with the totals (including balances carried over).

Table "F" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairing and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and totals.

Table "G" shows the number of pupils in the primary grades, and the number studying special branches.

Table "H" shows the number of schools in each county, the number of months schools were open, the number of teachers, male and female, the number of different pupils, the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "I" shows the cost of the colored schools and the statistics (under the same heads as those mentioned in Table "II") of the colored schools separately.

Table "K" shows the receipts from all sources for colored schools (including balance carried over).

Table "L" shows the expenditures for colored schools under the heads mentioned in Table "F."

Table "M" gives the statistics of the several colleges receiving State donations and of the State Normal School.

Table "N" gives the statistics of the several schools and academies receiving State donations.

The county reports give in detail the enrollment and the average attendance for each term, and the expenses of each individual school, under the heads of rent, fuel, repairs, incidentals, furniture, blackboards and stoves, books, and teachers' salaries. Every citizen can thus know what the school in his district has cost, and may become the auditor of the accounts. It is believed that no State in the Union furnishes a similarly minute detail of expenses.

REPORT OF THE SECRETARY.

REPORT OF THE SECRETARY.

The summary included in the report of the State Board of Education, and the State tables immediately following, give a comprehensive view of the condition of the public schools during the last school year ending July 31, 1901. The statistical reports of the Board of Commissioners of Public Schools of Baltimore City, and the School Commissioners of the several counties of the State, present, in minute detail, the facts concerning the schools, and show the receipts and disbursements for their support.

ARBOR AND HIGHWAY DAY.

Arbor and Highway Day was observed by all the public schools of the State on the 12th day of April, 1901, in pursuance of the following proclamation by His Excellency, the Governor:

EXECUTIVE DEPARTMENT, ANNAPOLIS, MARYLAND.

PROCLAMATION.

To the People of Maryland:

WHEREAS, By joint resolution, No. 15, passed by the General Assembly of Maryland at the January Session of 1894, the Governor is authorized and directed to issue, annually a proclamation, designating a day in April for the planting of trees, to be known as "Arbor and Highway Day;" and

WHEREAS, It has been suggested to me that it would be appropriate, at this time, to call the attention to the necessity for the care and preservation of the birds of our fields and forests:

NOW, THEREFORE, I, JOHN WALTER SMITH, Governor of the State of Maryland, do hereby designate Friday, the 12th day of April, 1901, as "Arbor and Highway Day," and I do recommend that the day be devoted by the people of this State to the planting of trees, and I especially recommend to parents and teachers in our schools that they encourage their children, or those under their influence, to plant and transplant at least one forest shade tree on that day by the side of a public road or about their school house, and that they be urged to

study the habits and needs of our birds and their young with a view to their preservation and increase.

It is hoped by the observation of this custom to counteract the evil effects resulting from the rapid destruction of forests and birds in our State, and to maintain a due proportion of forest land, which is essential to the comfort, health, and convenience of every country.

THE GREAT SEAL
OF
MARYLAND.

Given under my hand and the
Great Seal of Maryland.

Done at the City of Annapolis, on
the 18th day of March, in the year of
our Lord nineteen hundred and one.

By the Governor:

JOHN WALTER SMITH, *Governor*.

WILFRED BATEMAN, *Secretary of State*.

The following was the Arbor Day program at the Maryland State Normal School:

"And as for me, though that I konne but lyte,
On bokes for to rede I me delyte,
And to him give I feyth and iul credence,
And in myn herte have him in reverence,
So hertely, that ther is game noon,
That fro my bokes maketh me to goon,
But yt be seldome on the holy day,
Save, certynly, when that the monthe of May
Is comen, and that I here the foules synge,
And that the floures gynnen for to sprynge,
Farewel my boke, and my devocion."—*Chaucer*.

PROGRAM.

EXERCISES IN THE MAIN HALL.

HYMN—"Summer Days Once More Are Coming," *Bellin*
RESPONSIVE READING.

Is. 55: 12. For ye shall go out with joy, and be led forth with peace:
The mountains and the hills shall break forth before you into singing and
all the trees of the field shall clap their hands.

Ps. 104: 16. The trees of the Lord are full of sap; the cedars of Lebanon
which he hath planted; where the birds made their nests.

Ps. 96: 12. Let the fields be joyful and all that is therein: then shall the
trees of the wood rejoice before the Lord.

Cant. 2: 11, 12. For lo the winter is past: the time of the singing of the
birds is come and the voice of the turtle is heard in the land.

THE LORD'S PRAYER.

ASSOCIATIONS.

THE MARYLAND STATE TEACHERS' ASSOCIATION held its Thirty-third Annual Session at the Blue Mountain House, Washington county, Md., July 1, 2 and 3, 1901.

The following minutes of the proceedings have been furnished by the Secretary, A. G. Harley :

The Thirty-fourth Annual Session of the Maryland State Teachers' Association met in the pavilion of the Blue Mountain House, July 1, 1902, at 8 P. M., and was called to order by President Edwin Hebden, of Baltimore city. Prayer was offered by the Rev. Dr. Simpson of Carroll county.

The address of welcome was then delivered by Martin Luther Keedy, of the Hagerstown bar, who gave us Washington county's greeting, as well as nature's. He said the ocean had welcomed us, that here we get away from the cares and struggles of life in the midst of the heavenly regions. Mr. Keedy spoke of a recent visit to Yellowstone Park, to California, to the Great Salt Lake, and then to Pike's Peak, above the clouds, but he said here is a richer civilization for all our people. Master minds mark our journey across the continent, intelligent men are always needed and are beginning to be found everywhere. Our public schools equip these men. Teachers, all interested in public education, we bid you a hearty welcome.

The response was made by William H. Dashiells, Examiner of Somerset county. Mr. Dashiells thanked Mr. Keedy for Washington county's generous welcome, and paid a glowing tribute to

the late P. A. Witmer and quoted from his last address before this body. He then discussed the elements of success in our business. He described the aspirations of too many teachers; there must be adaptation, energy and capability. There must be professional education and training. There must be study of method. Method must be pursued. There must be experimental work. This is a great help, and model schools are a good source for training. Maryland teachers have proved their value, and should enjoy as well as profit by these annual reunions.

The inaugural address was then delivered by Edwin Hebden, President of the Association. Mr. Hebden said he would notice the present condition of education in Maryland, and referred to the action of the Washington county teachers recently, proving their confidence in their work and their devotion to the same. Teaching used to be unorganized, but not now. Our own reorganization is the best proof of our advancement. Our condition is no longer a stagnant period, but a working one. We are in the upward movement of progression. Industrial training has received its merited recognition all over the South. Natural science is there receiving a higher consideration, and mechanical genius has been brought into play, as well as book learning. Maryland's superintendent has proved his efficiency, and Maryland has brought into her domain another man, whose work has been equal to the emergencies of the hour.

Miss Mary Belle Cochran, of the Western Maryland College, then gave a recitation from Thos. Baily Aldrich.

Joseph Packard, President of the Baltimore School Board, then addressed the Association on the similarity of city and county systems, the appointing power being the material difference. He spoke well of the new system in the city, and its divorcement from political prestage. He referred to the reorganization of the city system, and illustrated its good results.

Dr. E. B. Prettyman, Chairman of the Committee on Legislation, etc., then read his report, recommending the State's claim on the Federal Government for its quota from the sale of the public lands; secondly, that the teachers' salaries should now be increased; thirdly, that this Association should be aided by the State, and we urge concentrated effort to this effect.

On motion of Dr. Simpson the report was adopted.

Adjourned until ten o'clock, July 2d.

MORNING SESSION.

BLUE MOUNTAIN HOUSE, *July 2, 1901.*

The morning session met at ten o'clock, July 2, 1901, with President Hebden in the Chair.

The minutes were read and adopted.

The President announced the following committees:

Enrolling Committee.

MISS MARGARET ROBINSON,	MISS BETTIE WALLIS,
MR. J. NEWTON WICKES,	MR. GRAHAM WATSON,
MR. G. E. L. PALMER.	

Auditing Committee.

JNO. P. FOLKNER,	MRS. E. E. PIPPIN,
MR. THOMAS C. BRUFF.	

Committee on Resolutions.

DR. S. S. SIMPSON,	MR. E. L. BOBLITZ,
MR. A. C. WILLISON,	MR. R. A. ROWLENSON,
MISS IDA V. DUVAL.	

Dr. Schaeffer, of Pennsylvania, then addressed the Association on "Grades of Thinking and Thinking in the Grades." He said: Rules were soon forgotten, but the power to think with the eye and the ear is a wonderful faculty. To think in mental pictures is a high power. Pay depends upon the grades of thinking; the higher the grade the higher the pay. Thinking in things and thinking in symbols, the mind must distinguish things from names. Thinking in the relations of things and in symbols.

The best paid work comes from the best thinking. The doctor says there are suggestive symbols and substitute symbols. Algebra, for instance, is beautiful thinking. There are expressive symbols. The best language is like plate glass. Teaching at its best forgets details. The images of things absent.

Music by Mrs. Stewart.

Mr. E. L. Boblitz, Chairman of Elementary and Secondary Schools, read his report:

Education, he said, should be thorough, both classes should prepare for life. Equipment should be complete, especially in the elements.

Miss Cochran then recited "Uncle Cy."

A letter of regret from Dr. Remsen was then read.

Dr. Lewis, of the Western Maryland College, then spoke of the co-relation of educational forces. He says the State is revising our work to harmonize it and unify our plans. We must learn to be, as well as to do. The State should teach all we can learn. We are *growing* men. Our ideal—the man, not the product. All teachers should be graduates. Living salaries should be paid.

Dr. West, Chairman of the Committee on English, reported on what would be a good high school course in English. What are we aiming at? What elements shall we study to secure it?

Get an appreciation of good literature. Study complete subjects. Let theory and practice go together. Dr. West presented a comprehensive course of study in English, and the subject was discussed by Prof. Reisler, of Easton; Mr. Boblitz, of Frederick; President Hebden, of Baltimore; Dr. Lewis, of Westminster; Mr. Willison, of Allegany; Mr. M. Bates Stephens, State Superintendent. The report was adopted.

The following committees were announced by the President:

Nominating Committee.

DR. WM. H. TOLSON,	REV. S. SIMPSON,
DR. A. E. SUDLER,	P. O'Rourke,
MISS NANNIE KEATING.	

Legislative Committee.

M. B. STEPHENS,	F. EUGENE WATHEN,
THOS. S. STONE.	

On motion of Mr. M. Bates Stephens the following Board of Managers for the Maryland State Teachers' Reading Circle was appointed:

M. BATES STEPHENS,	MISS S. E. RICHMOND,
MR. E. G. MORGAN,	MR. H. E. AUSTIN,
MISS MINNIE M. ROBINSON,	MR. EDWIN HEBDEN.

The following standing committees were announced:

School Legislation, Administration and Supervision—M. Bates Stephens, Chairman; John E. McCahan, Thomas S. Stone, F. Eugene Wathen, Charles J. Wright.

Elementary and Secondary Schools—E. L. Boblitz, Chairman; Edward Reisler, Miss Minnie Robinson, Mrs. M. J. Cahoon, Miss Carrie A. Drought.

English—Henry S. West, Ph.D., Chairman; John T. White, Mrs. E. E. Pippin, Miss Nannie C. Thompson, Miss Mary A. Hardcastle.

Geography—R. A. Rowlenson, Chairman; Miss Ella V. Ricker, Miss Alice Gray, Mary Hardcastle, Mary Green.

History—Dr. W. H. Tolson, Chairman; A. N. Ebaugh, Effie Hess, Rosalie Ogle, Nannie Keating.

Mathematics—A. S. Cook, Chairman; L. L. Beatty, Edwin Hebden, C. Alex. Fairbank, H. H. Murphy.

Natural Science—W. C. A. Hammel, Chairman; Miss Lydie Eckels, P. O'Rourke, John T. Smith.

Aesthetics—W. S. Crouse, Chairman; Miss S. E. Richmond, Miss Hilda E. Cross.

Physical Training—Miss India Rowland, Chairman; Miss Agnes M. McLean, Miss Helen A. Bradshaw.

Manual Training—Alex. Chaplain, Chairman; George A. Steele, James H. Van Sickle, Lieut. W. R. King and Frank Laughlan.

Kindergarten—Joseph Blair, Chairman; Miss Belle Upshur, Miss Zoe V. Armstrong.

Modern Languages—Charles F. Raddatz, Chairman; Walter C. Shafer, C. E. Carl.

The Association then adjourned to 8 o'clock this evening.

EVENING SESSION.

BLUE MOUNTAIN HOUSE, *July 2, 1901.*

The Maryland State Teachers' Association was called to order at 8 o'clock by President Hebden.

The minutes of the morning session were read and adopted.

The Nominating Committee was ordered to report six members to the Southern Educational Association.

Hon. Olin Bryan, State Senator from Baltimore city, then addressed the Association, who said, teaching should be your life work, no temporary matter. Its responsibilities are fearfully great. Love should ever be the dominant principle. Teachers must not only know, but know how to impart knowledge. We want the best at the head of our city schools. All should have the best they can get. Some teachers cannot get schools because they do not deserve them. Self mastery must be a cardinal trait. Teachers' lives control the destinies of most all the children. Our public schools are the life of the nation. The power of today lies in the hands of the masses, and the masses are in the hands of the teachers. Character-building makes successful men. You must teach morals as well as knowledge. Your lives must be above suspicion and reproach. Gain confidence, lead well, and live in communion with your pupils. Train minds to reason, and then lead to language. Gain attention and hold it. Teach mental independence. Never lose your temper. Never tell a pupil it is dull.

Music by Mrs. Stewart.

Mr. William H. Dashiells, Examiner for Somerset county, then read the report on geography and history, saying that there is not time enough given to these studies; that they both should be taught together. Text books should not vary so much. Maps and globes should be supplied plentifully. The committee, through its chairman, suggested the combination of the two studies. The giving of more time to both and a good reference library were recommended. The subject was further discussed by Mr. Reisler, of Easton, and Mr. Galbreath, from Belair.

Miss Cochran then recited.

Mr. Albert S. Cook, Chairman of the Committee on Mathematics, declared that he had no report to make, but recommended concrete work, especially in beginning geometry. The matter was discussed by President Hebden, who expanded this idea.

Miss Cochran gave another recitation and the Association adjourned until 10 o'clock tomorrow morning.

MORNING SESSION.

BLUE MOUNTAIN HOUSE, *July 3, 1901.*

The morning session of the Maryland State Teachers' Association was called to order at 10 o'clock, with President Hebden in the chair.

The minutes were read and approved.

The Committee on Geography and History was ordered to be divided into two committees.

Alex. Chaplain, Examiner of Talbot county, and Chairman of the Committee on Manual Training, made a comprehensive report, in which he argued the evolution of the teaching process, manual training, as it exists in our State; a practical and economic view of manual training; the relation of public education and industrial training to the commercial question, where the time for this work is to be found; the work of the pupils, kindergarten and organic part of the system, and recommended a schedule of work for ten years in ten grades. The report was discussed by Dr. Stone, of Prince George's county; Prof. Reisler, of Easton, and Prof. Raddatz, of Baltimore.

The secretary was ordered to present Mr. Chaplain's schedule to the State Board for its earnest consideration.

Miss Cochran then recited for the Association.

Mr. Crouse, Chairman of the Committee on Æsthetics and Examiner of Caroline county, read his report, urging writing, drawing, music, etc., which can be cultivated by all. He urged the interior decorations, the beautifying of the school grounds; gave prominence to environment, and encouraged instructions, procuring works of art, cultivate nature's works. He also told how to procure these at an early day, and said music is always available and valuable.

Miss Magruder, of Calvert county, gave a practical view of her own school work and grounds.

Music by Mrs. Stewart.

The report on Physical Education was then read by President Hebden for and in behalf of the chairman, who was absent.

The Association then adjourned to the afternoon session at 3 o'clock.

AFTERNOON SESSION.

BLUE MOUNTAIN HOUSE, *July 3, 1901.*

The afternoon session of the Maryland State Teachers' Association was called to order at 3 o'clock.

Music by Mrs. Stewart.

Prof. Raddatz, Chairman of the Committee on Modern Languages, reported.

He said: Eight counties reported 180 students, with Cecil leading. The number in the two languages were about equally divided. He then spoke of their value, saying there were about 8,000 probably in the State engaged in their study, and closed by referring to the benefits of their literature.

The Committee on Resolutions reported as follows:

BLUE MOUNTAIN HOUSE, July 3, 1901.

Mr. President and Members of the Maryland State Teachers' Association:

Your committee beg leave to offer the following resolutions:

Resolved, That the thanks of the Association is sincerely tendered hereby to—

Dr. N. C. Shaeffer for his excellent address, containing so much that will be helpful to our teachers.

To Dr. T. H. Lewis for his promptness in taking the place of Dr. Ira Remsen on the program, and for the advice and helpful suggestions contained in his address.

To Hon. M. L. Keedy for his address of welcome.

To Mr. Joseph Packard for his address containing so much valuable and desirable information concerning the school system of Baltimore city.

To Hon. Olin Bryan for his timely advice to teachers and promptness in accepting an invitation to address this Association at so short notice.

To Mr. James H. Van Sickle for his participation in the proceedings and interest shown in the Association.

To Hon. M. Bates Stephens for active and efficient services during the sessions of the Association.

To the members of the State Board of Education for their presence and helpful influence.

To Mrs. Jennie Gardner Stewart for the high class entertainment furnished during the meeting.

To Miss Mary Bell Cochran for the excellent recitations rendered by her.

Resolved, That your committee expresses its regret that Dr. Ira Remsen could not be with us as we expected, and the hope that he will find it convenient to be in attendance next year.

Be it further resolved, That the thanks of this Association be extended most heartily to Mr. Peter S. Flynn, manager of the Blue Mountain House, for his courteous treatment of the members of this Association and his untiring efforts to make their stay at Blue Mountain House a most pleasant one.

That the thanks of the Association be tendered the Remington Type-writer Company for the use of their writing machines and the indispensable service rendered by their Baltimore manager, Mr. Howard Spelman, and their stenographer, Mrs. E. B. Jordan.

Resolved, That it is the sense of the Association that our next annual meeting be held at Ocean City, Md.

Your committee learns with the deepest regret and sorrow of the death of Dr. Harry Revell, of Anne Arundel county, a member of this Association, and we hasten to offer our sincerest sympathy to his family in their bereavement.

Resolved, That the Maryland State Teachers' Association sincerely regrets the illness of ex-President L. L. Beatty, examiner of Queen Anne county, and hopes for his speedy recovery, and extends to him and his family their fraternal feeling of sympathy.

Resolved, That the scheduling of teachers' salaries is too much dependent upon the local school boards of the State, who by reason of insufficient legislative authority are restrained from exacting from the several boards of county commissioners a compensation proportionate to their services rendered to the children of the State; and be it further

Resolved, That the State should determine and fix the minimum salaries of her public-school teachers.

Respectfully submitted,

S. E. SIMPSON,
E. L. BOBLITZ,
A. C. WILSON,
R. A. ROWLENSON,

Committee on Resolutions.

The report of the Treasurer was read.

The committee to audit the Treasurer's report submitted the following report, which was adopted :

BLUE MOUNTAIN HOUSE, June 3, 1901.

To the Maryland State Teachers' Association :

Your committee appointed to audit the accounts of the Treasurer report that they have performed the duty assigned them.

They find the receipts from all sources, including the balance on hand from last year of \$62.55, to be \$351.05.

The expenditures are \$245 61, leaving a balance of \$105.44 in the hands of the Treasurer.

They have examined the vouchers presented for the payment of the bills and have found them correct in every particular.

THOMAS C. BRUFF,
E. ST. CLAIR BUTLER,
Committee.

The Committee on Nominations presented the following report, which was read, and on motion adopted :

July 3, 1901.

MR. PRESIDENT—

The Committee on Nominations beg leave to submit the following nominations for officers of this Association for the ensuing year :

OFFICERS.

<i>President,</i>	-	-	-	-	F. Eugene Wathen.
<i>First Vice-President,</i>	-	-	-	-	George W. Joy.
<i>Second Vice-President,</i>	-	-	-	-	John P. Fockler.
<i>Recording Secretary,</i>	-	-	-	-	Rev. A. G. Harley.
<i>Corresponding Secretary,</i>	-	-	-	-	Miss Rosalie Ogle.
<i>Treasurer,</i>	-	-	-	-	John E. McCahan.

EXECUTIVE COMMITTEE.

Joseph Blair, Chairman,	Dr. Ira Remsen,	Joseph Peterson,
Woodland C. Phillips,	Miss Bessie Brown.	

State Representatives to the Council of the Southern Educational Association:

Six years—State Superintendent M. Bates Stephens.
 Five years—Superintendent James H. Van Sickle.
 Four years—Dr. E. B. Prettyman.
 Three years—Prof. Wm. S. Jackson.
 Two years—Prof. C. E. Karl.
 One year—Prof. E. S. Burroughs.

Respectfully submitted,

WM. H. TOLSON, Chairman;
 NANNIE P. KEATING,
 S. SIMPSON,
 A. E. SUDLER,
 P. O'Rourke,
Committee on Nominations.

The Association then adjourned *sine die*.

A. G. HARLEY, *Secretary*.

Association of School Commissioners and Examiners of Maryland.

The Association of School Commissioners and Examiners of Maryland held its annual session at the State Normal School building in Baltimore, December 5 and 6, 1901, with Hon. George Biddle, President, in the chair, and Prof. Louis L. Beatty secretary.

The Executive Committee presented the following program, a copy of which had been previously mailed to each member:

OFFICERS.

<i>President</i>	George Biddle
<i>First Vice-President</i>	Dr. W. W. Duvall
<i>Second Vice-President</i>	F. W. Mish
<i>Secretary</i>	Louis L. Beatty
<i>Treasurer</i>	Ephrian L. Boblitz

EXECUTIVE COMMITTEE.

E. B. Prettyman, M. B. Stephens, Albert S. Cook.

COMMITTEE ON RESOLUTIONS.

Dr. S. Simpson, W. S. Crouse, Dr. A. E. Sudler.

PROGRAM.

(1) Best Means of Improving the Colored Schools of the State.

Paper—REV. S. R. WHITE, Rockville.

DISCUSSION . . . Samuel Dutrow, Frederick,
 George A. Blake, Elkton,
 L. C. Quinn, Crisfield,
 J. Briscoe Bunting, Prince Frederick,
 Joseph Packard, Baltimore City.

General Discussion by the Association.

(2) The County School Commissioners as a Factor in Public Education.

Paper—GEORGE O. GEARY, North East.

DISCUSSION John G. Mills, Cambridge,
 John S. Wilson, Catonsville,
 C. H. Stanley, Laurel.
 Joshua N. Warfield, Lisbon,
 Dr. James M. Corkran, Centreville,
 John D. Worthington, Belair.

General Discussion by the Association.

(3) What can this Association do to Encourage Rural School Consolidation?

Paper—DR. S. SIMPSON, Westminster.

DISCUSSION F. W. Mish, Hagerstown,
 T. C. Galbreath, Belair,
 E. A. Browning, Oakland,
 Dr. Zach. Morgan, Mechanicsville,
 Dr. W. F. Hines, Chestertown,
 Alexander Chaplain, Easton.

General Discussion by the Association.

(4) The Scope and Methods of Manual Training in the Public Schools.

Paper—W. S. CROUSE, Denton.

DISCUSSION Dr. R. A. Dodson, St. Michael,
 T. T. Owens, La Plata,
 John T. White, Cumberland,
 Newton S. Cook, Hagerstown,
 Martin J. Perkins, Cambridge,
 W. C. A. Hammel, State Normal School,

General Discussion by the Association.

(5) Should the Standard of Admission in our State Normal School be Raised?

Paper—H. CRAWFORD BOUNDS, Salisbury.

DISCUSSION E. W. McMaster, Pocomoke City,
 Ephriam L. Boblitz, Frederick,
 F. Eugene Wathen, Annapolis,
 Thomas S. Stone, Aquasco,
 W. H. Dashiell, Princess Anne,
 Louis L. Beatty, Centreville.

General Discussion by the Association.

(6) Needed Changes in our School Laws.

Roll Call of the Counties by the President.

General Discussion by the Association.

(7) Inspection of the State Normal School, December 6th, at 1 o'clock P.M.

(8) Luncheon in Gymnasium, December 6th, at 2 o'clock P. M.

**The following Minutes of Proceedings have been Furnished
by the Secretary pro tem, J. Briscoe Bunting.**

STATE NORMAL SCHOOL, *December 5, 1901.*

The annual meeting of the Association of School Commissioners of Maryland met—President George Biddle, presiding.

The meeting was called to order by the President, who stated the object of the meeting and the subjects coming before it.

Owing to the inability of the Secretary to attend to the duties, from illness, the President appointed J. Briscoe Bunting, as Secretary *pro tem*, to perform the duties of the office.

The roll was then called, and the following members responded :

A. C. Willison, F. Eugene Wathen, James B. Ensor, Albert S. Cooke, John T. Hershner, J. Briscoe Bunting, Thos. W. Jones, W. S. Crouse, Rev. S. Simpson, Geo. O. Garey, Cornelius S. Abrahams, George Biddle, Thos. T. Owens, Michael R. Stone, Wm. Grason Smith, Wm. P. Beckwith, Ephraim L. Boblitz, Edw. A. Browning, T. C. Galbreath, Thos. M. Johnson, Woodland C. Phillips, C. C. Brown, S. R. White, H. H. Sasser, Thos. S. Stone, Dr. A. E. Sudler, L. L. Beatty, Thos. H. Bock, John F. Duke, Geo. W. Joy, M. B. Nichols, H. Spencer Matthews, Alex. Chaplain, F. W. Mish, John P. Fockler, H. Crawford Bounds, Lemuel W. Onley, Laban T. Quillan, Edgar W. McMaster, James H. Van Sickle, J. E. McCahan, Henry A. Wise, Henry C. Fisher, Sam'l Dutrow, Chas. Slagle, Moses R. Hamill, Robt. A. Dodson, John P. Fockler, Dr. W. F. Hines, M. Bates Stephens and E. B. Prettyman.

The reading of the minutes of the last meeting were dispensed with.

Prof. S. R. White read a paper on "The Best Method of Improving Colored Schools." followed by discussion by Mr. Bunting, Jas. B. Ensor, F. W. Mish, M. B. Nichols and A. C. Willison.

The following resolution was passed :

Resolved, That it is the sense of this Association that it is in sympathy with and recommends the suggestion that colored teachers of the State attend summer schools to better fit themselves for their work.

Mr. George O. Garey, of Cecil county, read a paper on the subject, "The County School Commissioners as a Factor in Public Education." The subject was further discussed by Charles H. Stanley, of Prince George's county.

Dr. S. Simpson, of Westminster, read a paper upon the subject, "What can this Association do to Encourage Rural School Consolidation?" The subject was further discussed by Messrs. F. W.

Mish, T. C. Galbreath, E. A. Browning, Dr. W. F. Hines, Prof. Alex. Chaplain, Dr. E. B. Prettyman and Rev. S. R. White.

Moved that the Legislative Committee be instructed to prepare a bill to give the County School Commissioners authority to consolidate district schools and to provide for transportation of children, if any such additional legislation be needed.

The Chair appointed C. S. Abrahams and A. E. Sudler to audit the accounts of the Treasurer.

Prof. Prettyman announced the death of Dr. W. W. Duvall, of Prince George's, and moved that proper notice of his death be prepared by the Committee on Resolutions. Carried.

On motion, Chair was authorized to appoint a committee to take in charge all legislation recommended by this Association and announce the names of said committee before the close of the session.

The meeting then adjourned, to meet tomorrow morning at 10 A. M.

J. B. BUNTING, *Secretary pro tem.*

STATE NORMAL SCHOOL, *Friday, December 6, 1901.*

The Association met.

Minutes read and approved.

Roll called.

The Auditing Committee made its report, which was accepted :

We, the committee appointed to audit the accounts of the Treasurer, find them correct and accompanied with proper vouchers, and there is a balance in hand of forty cents.

Amount received.....	\$19 00
Paid as per vouchers.....	18 60
	<hr/>
Balance on hand.....	40

C. S. ABRAHAMs,
A. E. SUDLER.

The Committee on Resolutions, through Rev. S. Simpson, its chairman, reported as follows :

MR. PRESIDENT :

The Committee on Resolutions beg leave to make the following report :

Resolved, First. That this Association is in sympathy with any efforts to improve the colored schools of the State, and we recommend that the colored teachers be encouraged to attend a summer school at Howard University, Washington, D. C., or in some other place for a period not less than four weeks, and that the teachers who attend such summer school be not required to attend the county teachers' institute next summer. It is further suggested that said colored teachers be excused from teaching the last week of the school year, and that the salary of that week be paid to them to aid them in defraying the summer school expenses.

Resolved, Second, That we petition the General Assembly of Maryland at the next session to enact such legislation as will enable the School Commissioners in this State to consolidate any number of schools into one central school, and to use part of the school fund in the most economical way to have the children transported to and from the central school.

WHEREAS, Since the last meeting of the Association of School Commissioners of Maryland, Dr. William W. Duvall, first vice-president of the Association, and one of its oldest members, has passed from this world to a blissful eternity; and

WHEREAS, This Association desires to place upon record some minute expressing the loss we have sustained; now be it

Resolved, That in the death of Dr. Duvall the cause of public education, to which he devoted a larger part of his life, the people of his county, his many patients, with whom he was a beloved physician, and his family have sustained the loss of one whose place cannot be filled.

Resolved, That we miss at this meeting his cordial presence, his sage advice—always so modestly and kindly given—and trust the influence of his pure christian life and character will be emulated by those of us who knew and admired him.

Resolved, That a copy of these resolutions be entered on the minutes of this Association and a copy sent to his family.

WHEREAS, Since the last meeting of this Association, Dr. Harry M. Revell, for many years president of the Board of County School Commissioners of Anne Arundel county, and a member of this Association, has died; and

WHEREAS, During his entire service as school commissioner he was at all times active, energetic, and zealous for the advancement and betterment of the public schools;

Resolved, That in the death of Dr. Harry M. Revell this Association has lost a valuable member, and the cause of public education an intelligent advocate and a devoted friend.

S. SIMPSON,
W. S. CROUSE,
A. E. SUDLER,
Committee.

W. S. Cronse, of Caroline county, read a paper upon the subject, "The Scope and Methods of Manual Training in the Public Schools," and was followed by Dr. R. A. Dodson, and Prof. W. C. A. Hamill, of the State Normal School, Dr. Prettyman, Prof. Stephens, Prof. Chaplain, Dr. Simpson, E. A. Browning, Jas. B. Ensor, A. C. Willison and M. B. Nichols.

The President announced the Legislative Committee, as follows: M. Bates Stephens, Joshua W. Warfield and Dr. S. Simpson.

Mr. John D. Worthington, of Harford county, presented the following resolution:

WHEREAS, The value of statistical reports is regulated largely by their freshness; and

WHEREAS, The report of the State Board of Education is for reasons unknown to this Association frequently given to the public from six to ten months after the close of the fiscal year; therefore, it is hereby

Resolved, That it is the sense of this Association that the report of the State Board of Education should be printed and given to the public within five months after July 31.

Resolved, That the State Board be and hereby is requested to take the necessary steps to carry this resolution into effect.

JOHN D. WORTHINGTON,
A. E. SUDLER,
JOHN S. WILSON,
GEORGE W. JOY.

Moved and carried that Subject No. 6 of the program be left to the Legislative Committee.

Mr. Boblitz offered the following resolution referring list of questions to State Board of Education, which was adopted :

Resolved, That the following questions be submitted to the State Board of Education for decision, with the request that said Board answer them by circular to the Boards of County School Commissioners :

(1) Can the Boards of County School Commissioners pay the annual appropriation of \$10 required by the public school law to be paid to school districts, contributing ten dollars out of the appropriation for free school text books ?

(2) Can each school district be supplied with unabridged dictionaries for the use of the school at the expense of the free text book appropriation ?

(3) Can the expenses of School Commissioners and examiners incurred in attending the meetings of the State Association of School Commissioners and the State Teachers' Association be paid out of the State or county appropriation ?

E. L. BOBLITZ.

Mr. H. Crawford Bounds presented a paper on the subject : "Should the Standard of Admission in our State Normal School be Raised ?" The subject was further discussed by Mr. McMaster, F. Eugene Wathen, Thomas S. Stone, M. B. Nickols, Dr. Prettyman, W. C. Phillips, J. E. MacCahan, A. C. Willison and John D. Worthington.

The Chair requested that all bills be presented to the Treasurer, and that according to custom the janitor of the building will be paid the sum of five dollars, unless objection is made. There being no objection the Treasurer was directed to pay the amount.

Moved that Subject No. 5 on the program be carried over as unfinished business for consideration to the next meeting of this Association. Carried.

Moved to adjourn. Carried.

J. B. BUNTING,
Secretary pro tem.

EDUCATIONAL MANUAL TRAINING.

The following report of a committee appointed by the State Board of Education, upon Educational Manual Training, was read before the board at its meeting held November 27, 1901, and upon consideration, was, on motion, adopted, and ordered to be recorded and published in the State School Report for 1901 :

REPORT OF THE COMMITTEE ON EDUCATIONAL MANUAL TRAINING.

The Committee on Educational Manual Training, appointed by the State Board of Education, beg leave to report as follows :

The motive underlying all of what is called the new education, of which manual training, sloyd, kindergarten and the sciences form so important a part, is the desire to build for broad culture by laying broad, general foundations for the successful conduct of life. Education has been confined to abstractions. It should be the development of all the powers of man. Locke, Bacon, Rousseau, Carlyle and Comenius in their day advanced theories of a broader education, but it remained for Froebel and Pestalozzi to lead the way in bringing these theories into practice. Froebel made self-activity the cornerstone of his whole system. Pestalozzi says "education is the generation of power;" he meant not only the power to think, but the power to do. This power must be generated from the life of the child—through *his* desires and feelings. He must be educated through his own self-activity, in harmony with his desires instead of against them.

The desire to make things, to construct something, is a very large part of the childish instinct. It is only by experience gotten through this wholesome instinct that the child comes to know the great outer world and to find his place in it. This instinct, with the activity it engenders, if properly directed, will bring the child to desire what is good and wholesome. It is the mission of the new education to direct these activities into channels which shall lead to results most helpful to the child. It accepts the desires of the child and allows them wholesome expression.

Every physical act has a corresponding mental act, and right education attempts to make knowledge real to the child by making it a part of his experience, but always with his sympathy and never against it. This is education according to nature. Its principles were first brought into practice in the kindergarten, and are the motive of educational manual training. The training of the hand is of incalculable value in the building of the brain; so while the mind is developing strength and clearness, and acquiring material for thought, the eye and the hand should be trained along with it. The whole child should be sent to school. Educational manual training or Sloyd has for its object not only the harmonious development of the pupil during the formative age, but the bringing about by means of systematic exercises, the development of the pupil in certain definite directions. Through it he acquires habits of neatness, carefulness and accuracy; he learns self-confidence, acquires a certain self respect together with respect and love for bodily labor; his powers of observation and attention are developed; his hand and

eye are trained ; he gains in physical strength as well as in mental power.

But there is no special or technical end in educational manual training. The pupils are not to be trained to be skilled artisans, nor is the end and aim of educational manual training to turn out innumerable knick-knacks of no use to the child or any one else. The moral value of such training would be small indeed. The word "Sloyd" is a Swedish one, meaning skill, but it is not alone the skill which is developed through the training of the hand which is of the greatest value. The highest object of the system is not the turning out of a finished and polished model, but a finished and polished, well-rounded individual. The school is not a factory. The school concentrates its efforts on the *making*, and has regard only to the little *workman* ; the factory values only the thing made, without regard to the workman.

A distinct line must be drawn between *Educational Manual Training*, as employed in the schools as a part of a system of general education, and *Industrial Manual Training*, which is the feature of trades schools or industrial schools.

For some time previous to 1876 there were in Europe trades schools, where the use of certain tools and mechanical processes were taught, with, in every case, a particular trade in view. The methods were only such as applied to the particular trade, and the only aim was to turn out efficient workmen for that trade. Such is the Industrial, Trades Technical or Textile School of today.

The Imperial Technical School of Russia made a step forward in considering the educational value of the use of tools, by introducing a system of tool work, by means of models, working drawings and practical exercises, before permitting the execution of trade work. This started a revolution, but the system was faulty from an educational point of view, because only samples, or parts of objects, such as joints, were made.

In Sloyd the system of manual training is now almost universally employed as a part of general education, a series of models, each of use in some way in the pupil's home or school room, or play, affords opportunity to the pupil to become skillful in the use of tools, and gives, besides, mental and moral discipline. The exercises are always made from drawings and have in view the progression from one exercise to the other in logical order, and their adaptation to the needs and ability of the child.

"In the manual training first introduced into this country both motive and method were different. The motive was technical—the cultivation of a dexterity which might afterward be applied in industrial operations. The term "educational" is often given to this earlier technical work, and was sincerely given by the

people who introduced it, but they meant something quite different from what we mean when we use the term. As opposed to the making of something that would have a direct market value, the work was industrially educative rather than industrially productive, and the earlier teachers of manual training devised abstract joints and exercises by way of models in order to emphasize this difference. They feared that the schools might sometimes become factories and start out on the dangerous road of self-support, but the real difference is more profound than this. The earlier manual training was undertaken in order to give a skill of hand to be used in industry. It was a training of the hand. The later, or educational manual training, is undertaken in order to give a skill of organism to be used in life. It is a training *through* the hand. The one motive is technical. The other is human."

The idea is too common that a manual training school should be a machine shop. This was one of the many forms of so-called manual training that educators have tried and found wanting. The deficiencies of machine shop-practice for the purpose of educating hand and eye, as well as brain, are now generally recognized among progressive educators, but the deficiencies are all the more pronounced when boys are put into machine shop practice without the elementary training already advocated.

It is not denied that using machines gives some skill, and that they are in their proper place in the trade school, but there are many operations for hand work in constructions of various kinds that produce more skill and facility, and therefore these are more educational. The time of the young during the nascent period is too precious to be wasted by teaching them how to use machines; it should be devoted to the development of their own organism, to the training of eye and hand as well as the mind.

The whole tendency of modern industry is to make machines of us soon enough, and how pitiful the narrowness of life, the one side's development of millions whose capacity is measured by their ability to operate on ingenious machine. The fact that many occupations and trades do thus confine both mind and body within a stultifying range is all the more reason for so developing the mind and body that, while doing to perfection even the routine work one may have to do, he or she may be so trained as to rise above the otherwise narrowing effect of constant attendance upon machines or mechanical processes and be able to appreciate and enjoy the beautiful and good in the common things of every day life. It is a good thing to be so trained as to be happy, joyous and enthusiastic—to be educated so as to know how to enjoy life and how to make the most of it in whatever station our lot may be cast.

Since long and costly experience has demonstrated the greater educational power of the hand operations the time has come to relegate the machine-shop practice to its proper place. In the technical school or trade school it serves a remarkably useful purpose. That purpose is to impart to the youth who expects to be a mechanic or an engineer the training and practical knowledge of machines and processes employed in his trade or profession. Hence there is even more necessity for trade schools, engineering schools, textile schools and similar technical institutes than there is for colleges of medicine and surgery, divinity or law. But just as there are better means giving elementary and high school instruction mentally than that of introducing the studies that especially qualify the doctor, lawyer or minister for their profession, so there are better exercises for imparting real manual training to the youth than the trade processes and machine methods so important to the specialist in mechanics, steam or electricity.

In technical schools for special pupils machinery of various kinds and the use of power (electricity or steam) may be employed with reason, but we must be understood to protest only against the misuse of the things during the early stages of many children's lives.

Before the children are 15 or 16 years of age, if they have had the real manual training, any good teacher can pick out the ones suited to be engineers and mechanical workers. Their capacity in these directions will have shown itself. These, of course, may enter the special or trade schools, but to give machinery and machine work to large classes of boys, irrespective of their capacity and dispositions, before they have had real manual training, is as foolish educationally as to make them all carpenters only.

The distinction then between right manual training and trade processes is therefore clear. The one precedes the other, just as reading, writing and arithmetic precede accomplishments in the law or the ministry. Right here is a special field for the manual training that is bound to widen. The new idea is to teach the trade in trade schools or technical institutions where the youth is carefully instructed in technical processes by experts.

What then is manual training? To some it means an exercise for muscles—like gymnastics, and to others a process of making boys merely handy; others think it a way of teaching trades to children, and nearly all confound it with mechanical training and suppose a drill is necessary in sawing and planing, clipping, tiling, woodturning, etc., very few disassociating it from the use of machinery and from slow, tedious trade processes, or dream that it has anything to do with women and girls.

Real manual training for the education of individuals cannot be obtained by mechanical pursuits similar to carpentry shopping, filing, etc. Real manual training is not simply a matter of doing different things; it is the intelligent selection of modes from the many operations and pursuits most suited to produce the effect desired.

Swinging dumb bells or pushing a plane or saw produces muscles, but does not require the constant use of the intellect, the thinking powers are not increased in ratio. We must select for manual training purposes, work and methods that in addition to giving muscular activity will exercise the peripheral nerves as tools of the senses.

We respectfully recommend for adoption the following course for Educational Manual Training in the several grades of the State, viz.:

FIRST AND SECOND YEARS GRADES.

Kindergarten Occupations and Drawings. (Froebel's System).

THIRD YEAR GRADE.

Paper Folding.—Because some work has already been done in the kindergarten, it seems best to begin with paper folding for this grade. The pupil has practical exercises in measuring and drawing, in accurately cutting, folding and joining. Accuracy and neatness are cultivated and the pupil is better fitted for work in more difficult material.

Materials and Tools Used:

Paper—Assorted colors, cut accurately 8x8 in.
Twisted Embroidery Silk.
Scissors.
Crewel or Darning Needle.
Pair of Dividers.
Brass-Tipped Ruler.

Models.

- | | |
|----------------------------|-----------------------|
| 1. Envelope. | 7. Fancy Box. |
| 2. Pin Wheel. | 8. Triangular Holder. |
| 3. Cubical Holder. | 9. Cone. |
| 4. Rectangular Holder. | 10. Fancy Square Box. |
| 5. Square Box. | 11. Hexagonal Box. |
| 6. Triangular Wall Pocket. | 12. Octagonal Basket. |
| | 13. Fancy Basket. |

FOURTH YEAR GRADE.

Cardboard Construction.—The series of models for construction in cardboard is designed to follow the paper-folding course outlined for the Third Year Grade. In this course type solids are made of a material more difficult to work in than paper, and the pupil is prepared to take up intelligently the course in elementary whittling.

Materials and Tools Used:

White Bristol Board 16x11 in.
Photo-library Paste or Glue.
Ruler, Scissors, Dividers, (used in paper folding).
Penknife.

Models.

- | | |
|-------------------------|--------------------------------|
| 1. Cube | 13. Pentagonal Prism. |
| 2. Square Prism. | 14. Frustum of Square Pyramid. |
| 3. Triangular Prism. | 15. Icosahedron. |
| 4. Triangular Pyramid. | Supplementary Models. |
| 5. Square Pyramid. | 16. Crystal Form. |
| 6. Hexagonal Prism. | 17. Greek Cross. |
| 7. Hexagonal Pyramid. | 18. Oblong Box, with cover. |
| 8. Rhombic Prism. | 19. Oblong Tray. |
| 9. Octahedron. | 20. Pencil Box. |
| 10. Octagonal Prism. | 21. Hinged Box. |
| 11. Rhombohedron. | 22. Box with Divisions. |
| 12. Pentagonal Pyramid. | 23. Hexagonal Tray. |
| | 24. Eight-sided Tray. |

FIFTH YEAR GRADE.

Elementary Whittling.—In the course of Elementary Whittling light soft wood is used throughout and all the models deal with but two dimensions. The models are carefully graded in difficulty so as not to over-tax the child's ability, and are so planned as to bring in some new principle of laying out, cutting, or putting together with each new exercise.

Material—3-16 in. Basswood.

<i>Tools.</i> —Small Sloyd Knife.	12 in. Rule.	} Used in Paper Folding and Cardboard.
Small T Square.	Pair of Dividers.	
4 in. Steel Try Square.	Lead Pencil.	
7/8 in. board 1 ft. square to protect top of desk.		

Models.

- | | |
|-------------------|----------------------|
| 1. Plant Label. | 7. Pencil Sharpener. |
| 2. Thread Winder. | 8. Ruler. |
| 3. Cord Winder. | 9. Match Scratcher. |
| 4. Key Tag. | 10. Quatre-foil Mat. |
| 5. Calendar Back. | 11. Match Holder. |
| 6. Yarn Winder. | 12. Bracket Shelf. |

SIXTH YEAR GRADE.

Advanced Whittling.—The set of models for Advanced Whittling is planned to follow the course in Elementary Whittling and to precede the course in Wood Sloyd. This course requires the use of various kinds of wood and deals with length, breadth and thickness. The pupil is required to make and to read working drawings.

Materials.—Various kinds of woods.

Tools.—Same as used in Elementary Whittling.

Models.

- | | |
|------------------------|-----------------------|
| 1. Key Rack. | 9. Glove Mender. |
| 2. Corner Bracket. | 10. Seed Stick. |
| 3. Whisk Broom Holder. | 11. Flower Stick. |
| 4. Pen Rack. | 12. Crochet Needle. |
| 5. Wedge. | 13. File Handle. |
| 6. Letter Opener. | 14. Pen Holder. |
| 7. Whistle. | 15. Beveled Mat. |
| 8. Paper Knife. | 16. Beveled Ruler. |
| | 17. Flower Pot Stand. |

HIGH SCHOOL GRADES,

WOOD SLOYD.

Wood Sloyd best fulfills the conditions required when instruction in Sloyd is given with educational ends in view. It is adapted to the mental and physical powers of the children. By enabling them to make a number of generally useful articles, it awakens and sustains genuine interest. It encourages order and accuracy, and it is compatible with cleanliness and tidiness. Further, it cultivates the sense of form, and like gymnastics and free play it has a good influence upon the health of the body, and consequently upon that of the mind.

Additional advantages are, that it is excellently adapted for methodical arrangement, comprising, as it does, a great number of exercises of varying degrees of difficulty, some of which are easy; and that it gives a considerable degree of general dexterity by means of the many tools and manual operations which it introduces. The wood carving taken up in the 8th, 9th and 10th grades is only introduced where models made by the pupils are to be ornamented.

Special room required fitted up with following tools, etc.:

LIST OF TOOLS—MANUAL TRAINING. (Class of 24.)

23 jack planes, 16 in.	15 gouges, $\frac{1}{2}$ in.
1 fore plane, 18 in.	15 gouges, 1 in.
2 block planes, 8 in.	25 back saws, 10 in.
15 steel dividers, 6 in.	15 wooden mallets, 1 lb.
15 nail sets.	15 claw hammers, 1 lb.
15 spoke shaves, $1\frac{1}{2}$ in.	15 try squares, $4\frac{1}{2}$ in.
3 cross-cut saws, 22 in.	15 marking gauges, 6 in.
3 rip saws, 22 in.	15 dust brushes.
3 circle saws, 12 in.	15 oil cans, $\frac{1}{2}$ pint.
1 1-lb. hatchet.	15 drawing boards, 12x18 in.
1 monkeywrench, 10 in.	15 work benches, 2 ft. 8 in. high,
6 wooden clamps, 6 in.	6 ft. long, 2 ft. 4 in. wide.
1 file card.	15 T squares.
15 India oilstones.	15 60-deg. triangles.
2 Wachita oilstones.	15 45-deg. triangles.
6 flat bastard files, 10 in.	15 brass-bound rules, 2 ft.
6 half round files, 10 in.	2 each Jennings' bits, 1 in., $\frac{3}{4}$ in.,
6 taper saw files, 4 in.	$\frac{1}{2}$ in., $\frac{3}{8}$ in., 7-16 in., $\frac{3}{8}$ in., 5-16
4 slim taper files, 3 in.	in., $\frac{1}{4}$ in.
15 round screwdrivers.	2 Rose counter sinks.
2 ratchet braces.	2 screwdriver bits.
15 socket-firmer chisels, 1 in.	1 gimlet bit each, 1-16 in., 3-32 in.,
15 socket-firmer chisels, $\frac{1}{2}$ in.	$\frac{1}{8}$ in., 5-32 in., 3-16 in., 7-32 in.,
15 socket-firmer chisels, $\frac{1}{4}$ in.	$\frac{1}{4}$ in.

SIMPLE BENCH WORK—Seventh Grade.

1. Rule.	12. Vase Stand
2. Label.	13. Key Board.
3. Key-Tag.	14. Bracket.
4. Pencil Sharpener.	15. Spool Holder.
5. Round Mat.	16. Envelope Opener.
6. Thread Winder.	17. Cat and Bat.
7. Quatre-Foil Mat.	18. Picture Frame.
8. Triangle.	19. Match Box.
9. Fish-Line Winder.	20. Wind Mill, to be made by class as
10. Cutting Board.	a whole.
11. Yarn Winder.	

BENCH WORK—Eighth Grade.

- | | |
|-------------------|---------------------------------------|
| 1. Glove Mender. | 10. Bread Board. |
| 2. Flower Stick. | 11. Flower Pot Stand. |
| 3. File Handle. | 12. Bicycle Rack. |
| 4. String Winder. | 13. Hammer Handle. |
| 5. Round Ruler. | 14. Wall Bracket |
| 6. Paper Knife. | 15. Towel Rack |
| 7. Tool Rack. | 16. Picture Frame. |
| 8. Hat Rack. | 17. Umbrella Stand, to be made by the |
| 9. Coat Hanger | class as a whole. |

BENCH WORK—Ninth Grade.

- | | |
|----------------------|------------------------------------|
| 1. Ruler. | 9. Spoon. |
| 2. Knife Strop. | 10. Envelope Stand. |
| 3. Sleeve Board. | 11. Pencil Box. |
| 4. Blotter. | 12. Towel Rack. |
| 5. Flower Pot Stand. | 13. Picture Frame. |
| 6. Pen Tray. | 14. Book Rack. |
| 7. Ink Stand. | 15. Step Ladder, to be made by the |
| 8. Brush Holder. | class as a whole. |

BENCH WORK—Wood Carving { Groove carving, } Tenth Grade.
 { Chip carving, }
 { Flat carving. }

- | | |
|-------------------|--------------------------------------|
| 1. Tool Rack. | 9. Printing Frame. |
| 2. Tea Pot Stand. | 10. Book Rack. |
| 3. Cross Stand. | 11. Folding Bicycle Rack. |
| 4. Shelf. | 12. Towel Rack. |
| 5. Paper Knife. | 13. Letter Rack. |
| 6. Mitred Frame. | 14. Handkerchief Box. |
| 7. Clock Bracket. | 15. Folding Chair, to be made by the |
| 8. Tray. | class as a whole. |

BENCH WORK—Wood Carving (Relief) { Low Relief } Tenth Grade.
 { High Relief }

- | | |
|-------------------------|---------------------------------------|
| 1. Table Mat. | 9. Scholar's Companion. |
| 2. Blotter. | 10. Ink Stand. |
| 3. Pen Rack. | 11. Hand Mirror. |
| 4. Easel. | 12. Drawing Board and T Square. |
| 5. Whisk Broom Holder. | 13. Dovetailed Box. |
| 6. Salt Box. | 14. Medicine Cabinet. |
| 7. Pen and Pencil Tray. | 15. Table, to be made by the class as |
| 8. Sugar Scoop. | a whole. |

The report of your committee, as will be seen by the annexed statement and outlined course of Educational Manual Training, which we beg to be considered as a part of this report, contains a discussion of Educational Manual Training and outlined course of work for the several grades, a list of tools necessary for Manual Training Schools, and names of models for each year's grade. The report will not be complete without drawings and explanations of models, which are necessary to make the manual training course a complete system; and after a careful examination of a series of pamphlets on Educational Manual Training prepared by Prof. William C. A. Hammel, which contain drawings and explanations of working models along the line of lists

contained in this report, we recommend that those pamphlets be adopted as a part of this report, all of which are respectfully recommended by the committee for your favorable consideration.

E. B. PRETTYMAN,
M. BATES STEPHENS,
WM. C. A. HAMMEL,
Committee.

Report of the State Superintendent of Education.

*To the Honorable the Members of the
State Board of Education:*

GENTLEMEN: The Maryland General Assembly of 1900 created the office of State Superintendent of Public Education and empowered the Governor to appoint some person to fill the position for a term of four years beginning on the first Monday in May, 1900. Up to that time the Principal of the State Normal School was *ex officio* State Superintendent, and he was required to divide his time and energies between the two positions. This perhaps was expedient when the present school system was inaugurated, and when the Normal School was in its infancy. Since then there has been a steady advance along the lines of public school work and almost a phenomenal increase of schools and pupils in the counties of the State. The constantly increasing demand for trained teachers has multiplied the duties of the Principal of the Normal School, and for years past he found it inexpedient as well as impossible to give much of his time to those duties which ordinarily devolve on a State Superintendent. Fortunate for all concerned the two gentlemen who have filled this dual position have possessed extraordinary mental and physical power, whereby they could render efficient service both in the direction of the Normal School work and the administration of school interests of the State. But in spite of this fact, when it was considered how the schools were increasing in all the counties, the growing need of closer supervision by some State school official and the need for teachers who had been trained at the Normal School, the conviction has been forcing itself on the educators of the State for years that the principal of the Normal School should be relieved of all work aside from the management of the Normal School that he could the better broaden the facilities and increase the efficiency of that institution, which has become such a vital factor in public education. The Legislature of 1898 took the first step toward such relief when the office of State Institute Director was formed and Dr. Samuel E. Forman appointed to fill the position. The law regarding the holding of an annual institute in each county

for years had been mandatory, but for various reasons this adjunct to the school system had become obsolete in a majority of the counties. Under Dr. Forman's direction an impetus was given to institute work, and since 1898 they have been regularly held in the several counties, and the work begun by him has effected a better organization among our teachers and promoted a higher professional spirit. It soon became plain, however, that the creation of such an office with authority limited to the holding of institutes would not accomplish for the school system all that was needed, and this conviction stated the necessity for a new school official who should be given the general supervision of school interests with well defined duties and be held responsible for their rightful performance.

The objection had been raised against the Maryland school system that it lacked certain features of uniformity that are essential to a complete State system, and if there be any grounds for such a criticism it may have grown out of the fact, that in the absence of close supervision, there may be too much difference in the several county systems. It will be well for such advocates of rigid uniformity to realize that in a State where the counties vary from five to ten months for a school year, it is absurd to expect similar conditions for all the counties. But a State Superintendent, by devoting his whole time to the duties of his office, can do much to encourage whatever uniformity is consistent with the varying conditions.

There is some vagueness in the wording of the law creating the office as to the character of my report to your Board. It has been my pleasure to meet with you in your quarterly meetings, and from time to time have informed you of the conditions of school work throughout the State, as observed by me. Your request that I make a brief report on the general features of my work for the past scholastic year, that it may be included in the report of your Board, shall be granted, and I submit a brief discussion of some phases of our work which, by your advice, I have tried to emphasize.

Acting under authority of the Act of Assembly creating the office of State Superintendent of Public Education, His Excellency, John Walter Smith, *ex officio* President of your Board, did me the honor to appoint me to fill the position, which appointment was made in May, 1900; and shortly thereafter I entered upon my new duties. Apart from any consideration of the appointee, I am persuaded that the action of the Governor in appointing one of the agents of the system to fill the new and responsible office was a compliment to our own public school forces, and shows his absolute confidence in the healthfulness of public instruction in our State. The time intervening between

the date of the appointment and the close of the scholastic year involved the vacation months, and nothing was done through the agency of our department to merit mention in this report. Hence what may be said herein will pertain to the school year of 1900-1.

THE COUNTY INSTITUTE.

The law creating the position of State Superintendent repealed the law creating the office of institute director, and the Superintendent is required to arrange for and attend the county institutes. The plan adopted by the institute director was practically followed during the year. That the opportunity might be afforded to become acquainted with the teachers and school conditions in each county, I spent from three to five days in each institute, and held but one institute in a single week. By this plan most of my time for the school year was spent in the institutes. I am convinced that to follow this plan would limit my time for the other duties incumbent upon me to such an extent that they may be discharged in an unsatisfactory manner. I believe, too, that the best interests of the schools require the institutes to be held very early in the school year. Whatever instruction and enthusiasm can come from such a meeting are most needed when teachers are about to begin their year's work. At such a time their plans for the year have not been determined and the new ideas and devices learned at the institute can be engrafted without confusion. The Examiner is given an opportunity to spend a week with his teachers when they most need his counsel; young teachers entering upon their duties for the first time need all the instruction they can get from an institute, and no time is so opportune as the week before they enter upon those duties, or as quickly thereafter as possible. Closing the schools for a week is not popular with our patrons, the public, but it meets with the least opposition when our schools are starting, for at that time it affects the smallest number of pupils. Quite a respectable number of pupils attend school but a few months (possibly weeks) during the winter, and it seems unwise to go to that portion of the school year to select time for the institute and in that way further decrease their school opportunities. With your permission I shall endeavor to hold as many of our institutes as practicable for the coming year during the months of September and October, and by so doing I am sure we can promote the usefulness of this factor for the improvement of our teachers beyond that to which it has heretofore attained. One embarrassing feature of institute work has been a lack of efficient instructors. While we have been aided substantially by the efficient instructors of the Normal School their time is so thoroughly taken up with their duties at

the school that it is unfair to expect them to respond to all the demands made upon them in this connection. Instructors from other States have been employed, and they have done exceptionally well; and while I have nothing but words of praise for their skill and ability, it is not speaking disparagingly when I say they do not wholly understand our school conditions or anticipate the needs of our teachers as thoroughly as do our Normal instructors. For this reason I make the appeal that the faculty of the school be increased to that extent that our county school officials can receive liberal aid from this source for their institutes. When our County School Commissioners realize fully that the work of holding an institute is a serious matter, and for the loss of a week's instruction to pupils there must be such an increase of teaching power as the result of institute work as will more than compensate for the apparent loss of time while schools were closed, they will divert enough money for this purpose to make the instruction helpful in the broadest sense. Nothing in the way of school management can be more extravagant than for a county school board to deny their teachers capable instruction in their institutes because it requires the expenditure of some money to effect it. It is false economy to keep the best talent out of our institute sessions because it costs something to obtain it. The School Examiners of the State, I find, are a capable set of educators, and it is my purpose the coming year to have at least two of them in every institute. Aside from the part he may take in the program his visit to other counties will enlarge his ideas and perhaps give suggestions which may prove valuable to him in his own work. I think, too, that by such a step the examiners can best help to bring about certain uniform methods and practices which we all sincerely wish to accomplish. The work of the institute for the past year was almost exclusively on the professional side of the teachers' work. Continuing but five days, there is no time for academic instruction, and as the law providing for the institute clearly states that it is designed as a temporary Normal School, it is evident that to divert any portion of the time to other than professional work would defeat the purpose of those who framed the law. Teachers attend the institute to be instructed not in the branches of study, but in a knowledge of the best methods to teach those subjects. The controlling purpose of institute work should be to increase teaching and training ability, develop skill and tact to impart instruction, convey right ideas of instruction, and give power to arouse in the pupil a desire for knowledge. It is my purpose to have our institutes conform to these purposes. The work in this particular for the past year lacked definiteness, and for the coming year I expect to publish an institute manual, with proper institute syllabi and outlined subjects, and have this in the hands

of the teachers throughout the State before the time for holding the institutes begin. By such a plan every teacher will make preparations for the sessions and come prepared to take part in the discussions.

I wish to state that the time for holding the institute for Somerset county had been fixed for April, but for circumstances over which the county school officials appeared to have no control the schools for that county closed in February after a session of five months, and the institute was postponed until October. The institute for Cecil county was also postponed from April to the first week of September. This was done by request of the President and Secretary of the Board, who were compelled to be away from the county the week during which the institute was to be held.

UNIFORMITY IN BOOKKEEPING.

Section 17 c of Chapter III, Article 77 of the Code of Public General Laws, provides that it shall be the duty of the Superintendent of Public Education "to examine said county (school) boards' statements of expenditures of school funds and submit his judgment on the same to the State Board of Education." The State Board has interpreted this to mean that the State Superintendent shall, in addition to examining the annual reports made to the State Board, examine the account and record books kept by the secretaries of the county school boards. Considering the limited time for such an examination, it is important to have a uniform system of keeping the records, that such an examination may be made with facility and in a minimum time; and in view of the further fact that the accounts to be kept by all School Boards are, with very slight differences, the same, varying in the volume of business rather than kind, it is believed that the establishing of such uniformity will work no hardship to any office. The system presented for your consideration, and which received your unanimous approval, embraced, I think, all the methods common to the various county systems then in use, and thus made as little change as possible. While some changes have been made in the classifying of accounts, it is hoped that these will lead to a closer and more uniform classification, enabling any board to better compare the cost of schools in its county with that of other counties. The new system calls for no more books than have been in use in many of the counties; no more accounts are required to be opened; a saving of entries is secured, and the discovery of a mistake in entry is made easy. By your direction pattern sheets of books of the new system, with full explanations, were sent to the several boards in March with instructions that the new system go into effect August 1, 1901, which day begins the new scholastic and

fiscal years. I have made careful inquiry and am satisfied the various boards procured the books and inaugurated the new system as per your recommendation.

NEW COURSE OF STUDY.

The schedule of grades which for many years had been the basis of all county school curricula seemed unsuited to present school conditions, and your board very wisely determined to revise it and afford our schools such a course as will meet the intelligent demands for a broader public school education than was possible by following the outline of the old schedule. As a member of the committee appointed to perform this task I appointed a committee of ten representative teachers in each county, with the Examiner as chairman, to report such changes as were desirable and make suggestions as to the proper scope of a public school course. Many of these committees made reports and many excellent ideas were gained therefrom and incorporated in the report of your committee. Examination was made of courses of study of at least twelve States, and many months of research and investigation were spent before the course of study adopted by your board on July 1, 1901, was submitted to your board for your action. The revised course differs from the old schedule of grades both in the amount and character of work to be done. This is necessary because we have become better acquainted with the needs of the pupil and have a clearer knowledge of a proper regard for the best interests of such needs. Public education has become much broader in its scope and character than formerly, and the public school is fast becoming a greater factor in the comprehensive education of the child. In view of this new attitude and the more modern demand that our instruction shall regard and develop so many sides of the child's nature, it becomes incumbent on the school officials of our State to so arrange our instruction, as presented through our course of study, that it will fairly meet and satisfy every reasonable and intelligent demand made by the people who support the school system and whose children are entitled, through the agency of that system, to that education which will fit them for complete living. It is believed that a careful study of the arrangement of the studies and the proportion of time for each of them as laid down in the course of study recently adopted and suggested by the programme course of study approved by your Board, will commend it as feasible and well calculated, if wisely followed, to give to our pupils such an educational equipment as will fit them for intelligent citizenship and enable them to enter the sphere of business life and meet successfully its problems.

The new course of study is a standard of public school work for all the counties. It was not framed in the interest of any

class of teachers. We cannot offer a different course to teachers of one grade, or two or three grades, and to those who may teach as many as seven. That the new course may work a hardship, if literally followed, on some of our teachers—those who teach many grades—none will deny, and it is not expected or required that such teachers will live up to its recommendations as completely or do the work as satisfactorily as teachers with fewer grades. All the general exercises and supplemental work suggested throughout the course may not be practicable in all schools; how many and to what extent they are practicable we leave to the calm judgment of our teachers, who, I am persuaded, are zealous to do the most and best for their pupils under the circumstances surrounding them.

The subject of grouping and correlation of studies has attracted much attention of late among educators. In our new course emphasis has been laid on the importance of correlation by presenting all branches of the public schools under five co-ordinate groups, which classification will assist teachers in the matter of proper correlation. For the elementary school course we have presented the following groups, which grouping was recommended, in the main, by the report of the Committee of Fifteen, which is considered the highest authority on this phase of public education:

1. Language—Literature—including reading, penmanship, spelling, literature and grammar.
2. Mathematics, including number, arithmetic, form and geometric exercises, oral algebra and geometry.
3. Science, including nature study, geography, physiology and information and observation work.
4. Conduct, including history, biography, civics, morals and manners, constitutions.
5. Art, including drawing, singing, manual training and physical culture.

The aim of our new course and of school instruction, generally speaking, is to secure breadth, accuracy, facility and inspiration. But in order to bring about these results the subjects must be presented in an orderly manner and so dovetailed as will not only economize in the matter of time but bring enrichment to the studies thus correlated.

I am convinced that the adoption of the new course will start our schools on an era of greater usefulness and raise school work to a higher plane of excellence. I doubt not after a year's test some weak points may be detected, and it is my purpose to call our representative educators together after the first year of its working and have a discussion looking to such changes as may be essential to make it more nearly perfect, and I feel that your

Board will be as ready to listen to such recommendations as you were to adopt the new course of study. A copy of the course was placed in the possession of every teacher before they entered upon their school work for the year 1901-2.

MANUAL TRAINING SCHOOLS.

The General Assembly of 1898 (Chapter 273) recognized the educational value of manual training, and provided a liberal appropriation for the establishment of one school for white and one for colored pupils in each county. Talbot and Kent counties were the first to establish such schools, and Garrett soon followed their example. In 1900 Prince George's and Montgomery counties provided manual training schools, and at the close of the fiscal year Baltimore, Harford, Anne Arundel, Howard, Allegany, Carroll, Cecil, Queen Anne's, Caroline, Dorchester and Wicomico counties were arranging to start similar schools. In a few years, perhaps, all the counties will have availed themselves of the appropriation and engrafted manual training as a part of their instruction. The time for argument in favor of training the hand along with the head and heart seems to have passed, and the foremost leaders of educational thought recognize the value of manual training. Our State cannot claim that she is foremost in the development of the manual training idea, but she takes the lead in the encouragement, at least financially, extended to this new department of public education. Many persons misapprehend the purpose of such training in supposing that its chief purpose is to teach the pupil a trade. This is not its aim; for it would be as unreasonable to expect our public school system to give the pupil a trade bias as it would a denominational bias. Schools maintained at public expense have no more right to teach one trade than another, and to introduce all would be entirely impracticable.

The work in manual training is to bring about a more symmetrical development of the child's faculties, so that whatever profession or vocation he may enter he shall be the better prepared to discharge its duties worthily.

The law providing the appropriation for manual training needs some amendments or modifications. There are not enough safeguards to protect the appropriation, which is made for a specific purpose, or best promote the purposes of such schools. I think the coming Legislature should re-enact the law with the following provisions:

1. As the \$1,500 is an appropriation for a special purpose it should be kept intact for manual training and no part diverted to other school needs.

2. There should be an annual inspection of the manual training departments by some State school official or some person to be designated by him, and a full report of their condition made to the State Comptroller. From the exhibit of such report (which should be sent to the Comptroller on or before August 20th of each year) he should determine what schools are entitled to an appropriation for the ensuing year. A similar report should be made to the State Board of Education on or before August 20th, giving number pupils taking course, teachers employed, amount and kind of work done during the year, and a statement of receipts and disbursements of the fund.

3. The State Board of Education should furnish such schools a course in educational manual training, and this should be required as the minimum amount of work to be done by such schools.

4. County school boards should be given authority to use whatever portion of the manual training fund remaining after the needs of the manual training department have been met, for supplying material and encouraging manual training instruction in other schools of the county desiring to introduce it.

FREE SCHOOL BOOK FUND.

Since 1896 there has been an annual appropriation of one hundred and fifty thousand dollars for the purchase of text books for pupils. The first appropriation was insufficient to provide a supply of necessary books, and at the time there was considerable embarrassment because of it. After the third year of the free book law all the counties of the State seemed to be fairly well supplied with text books, and a large majority of the counties since that time have reported a surplus of the fund. In such cases the temptation is strong to purchase from this surplus fund charts, maps, globes, stationery, etc., which cannot be called text books, and it also encourages frequent changes of text books, and too frequent changes confuse school work rather than advance it. During the year there was an unusual number of adoptions of text books. In a few counties the text book list was almost entirely changed, and while the motive of such school officials is not questioned in the least, it is a mistake to change text books unless the ones in use have outlived their usefulness. Limited as the appropriation is to the purchase of text books, the amount could be reduced to one hundred and twenty-five thousand dollars, and this would be sufficient to keep up the wear and tear of books and leave enough to make necessary changes of books, provided the fund is equitably apportioned. Whatever argument there may be in favor of the present basis for the apportionment of the State school tax cannot obtain in apportioning the free

book fund on such a basis. The counties with a large colored population receive much more per pupil than other counties, while the cost of furnishing books in those counties where there are many colored pupils is proportionately less because nearly all colored pupils are in the primary grades, and the cost of books for such pupils is comparatively small. A new basis of apportionment will work no hardship on such counties, and those counties that are not receiving too much book fund with the present appropriation will probably receive about the same amount with a reduction, and this equitably distributed.

I was Examiner of the schools in Caroline county when the free book bill became a law, and remained in the board until 1900. Our county received about fifty-two cents per pupil, which was almost the minimum amount received in any county. Our percentage of pupils above the seventh grade was larger than for the majority of counties; two sets of readers were supplied for first, second and third grades; many supplementary books were supplied pupils; the teachers were furnished many books from which supplementary work could be given, and other purchases made from free book fund, yet for all the years after the third our appropriation was more than sufficient for text book needs. I may say, too, that during those years some new adoptions were made which entailed considerable expense. But in order to bring about this condition our board and the teachers rigidly enforced the rules for the care of books.

The Legislature should place one safeguard about a text book by stating that it cannot be adopted for a period less than three years.

ARBOR AND BIRD DAY.

In accordance with the Governor's proclamation naming Friday, April 12th, as Arbor and Highway Day, the schools throughout the State observed the day with tree planting and other appropriate exercises. I believe that to insure a proper care and protection of both trees and birds we must implant in our boys and girls an intelligent appreciation of their value from an aesthetic as well as a useful standpoint. There is need of education along this line that our rural districts, more especially, may not be robbed of the beauty and healthfulness of their trees and that commendable sentiment which cannot be dissociated from our birds. Increased interest in nature study on the part of teachers is doing much to encourage this idea among the children, and we can look for a more healthy sentiment in this regard from the next generation.

Recognition on the part of the State in setting apart one day in the year to be known as Arbor Day has become a strong factor in crystallizing popular sentiment in favor of its purposes.

In order to encourage our school teachers to appropriately observe the day I prepared a pamphlet of thirty pages with appropriate selections and suggestive programs, and furnished each teacher of the counties with a copy. I have reasons to believe that the day was more generally observed by our schools than heretofore.

TEACHERS' READING CIRCLES AND LIBRARIES.

I took special pains during my visits among teachers to revive interest in the Maryland State Teachers' Reading Circle, which was organized in 1889 and for some time thereafter proved a factor in stimulating interest in the teachers' profession. For reasons well known to those who fostered the movement the organization steadily declined in numbers and interest until there was scarcely a vestige left. Some such organization is necessary to the welfare of the teaching profession, and there is quite a good sentiment in favor of its reorganization. Notwithstanding the fact that our Normal Schools are sending out an increased number of graduates every year, a large majority of our young teachers enter upon their work with little or no preparatory training. If correct methods are employed their adoption is often the result of accident rather than an intelligent appreciation of their value. Such persons ought to be reached by some agency, and the reading circle plan presents itself as a feasible one for such teachers. At the meeting of the State Teachers' Association, held at Blue Mountain in July, the following were appointed a Board of Managers for the reading circle: Edwin Hebden, G. Emory Morgan, Sarah E. Richmond, Margaret M. Robinson, Herbert E. Austin and M. B. Stephens. This committee began at once to take steps for organizing local circles throughout the State where teachers may pursue a professional course of study and meet together for mutual interchange of views. Along with this there have been organized in several counties teachers' libraries, where teachers can procure the use of a large number of books bearing on their work without cost to them.

OUR TEACHERS.

I have been much gratified in meeting the teachers in different sections of the State to find them so earnest and enthusiastic for the cause of education in which they have enlisted. For a number of years the teaching profession was chosen by our most cultured and intelligent young ladies. Other professions and vocations were not so inviting and the school room has been able to command such talent. But our times are changing and other employments which are more remunerative are opening for our young ladies, and the school system will not likely prove so

attractive to them as in the past. Cost of living is steadily increasing, and in other spheres this is recognized by an increase of wages, but the salary of teachers, already too small, remains the same. Because of this we are in danger of losing many of our most skillful teachers and fail in the future to receive as large a percentage of the best and brightest young men and young ladies for school work. When we consider the amount and high character of the work required of our teachers and then remember that the average second grade teacher in the counties of the State receives an average salary of less than two hundred and seventy dollars, it is apparent that herein lies the weakness of our school system. It is true that the public school is the university of the people, and the tendency is unmistakable to expect more from the public school each year. The time will come when all the money appropriated by the State will be spent through the agency of the public school system and the standard of public education raised to a higher plane of efficiency than now obtains. But the worth of the system must be determined by its teaching force. We all know that the school is what the teacher makes it, and realize that the teacher is the most vital part of public education. The position must be exalted and its occupant must become more highly appreciated. The State can confer no greater benefit on its citizens or advance more substantially the material prosperity and happiness of its people than to take an advanced position regarding this overshadowing question. Teachers must receive a salary somewhat commensurate with the high character of the work required of them or they will go into other fields of employment where their services will be more appreciated. If our people will pause for a moment and seriously consider this matter, think of the scope of public school work, the tendency to commit to the teacher the whole child—his body, mind and character—and expect these to be regarded and trained so that when the arena of manhood or womanhood is reached the education and training received at the public school will be sufficient to meet the responsibilities of intelligent citizenship and ordinary business life, and then think of the paltry sum paid for these services, I believe there will follow larger appropriations for school purposes and a more hearty co-operation in all matters which affect the educational policy of our State. The children of the State who are our pupils are the hope and pride of their parents. They are ready to make any reasonable sacrifice for them except to have the tax rate raised that they may be better educated. The absurdity of this is shown when they admit that the best legacy to leave the child, one of which it cannot be robbed, is an education such as our public school system is designed to give.

One step toward more uniform school work in the State, and which, if taken, would afford teachers of several counties more

salary, will be to make the minimum school year eight and one-half or nine months instead of seven and one-half months, as is now the case. There is but one county where such a change would work a hardship, and that county is Garrett. Even in this case her position in this matter would not be further embarrassed because she has not been able to keep her schools open for any year the required number of months to entitle her to the fourth quarterly distribution of the State school tax. This change would give to County Commissioners an excellent reason for increasing the county school appropriation and would also relieve county school officials from the embarrassing situation of a school year entirely too short to accomplish the work as laid down in the school curriculum.

SCHOOL EXAMINERS' OFFICIAL VISITS.

No duty incumbent on the county school examiner is more important than the one which requires him or his assistant to visit his schools at least three times if his county contain fifty schools or less, and twice if more than fifty schools. In this way the examiner is brought into very close relations with school-room work, and here he observes the methods employed by the teacher. As the examiner should be not only a good scholar in the broad sense of that term, but should have a clear idea of the subject of pedagogy, that he may readily detect unpedagogical teaching and suggest better methods, it is expected that his visit prove an inspiration to both teacher and pupil. Our examiners, in the main, during the past year, have been faithful in the performance of this as well as their other duties, and we expect through this means to engraft in the schools better methods and to make school-room instruction more uniform. Our plan has been to have the examiners make monthly reports of their visits on uniform blanks, and in this way much valuable information is brought to the attention of the State school officials. In the very few cases where this requirement of the law has not been met, I respectfully ask that you adopt such measures as will lead all such school officials to see the importance of visiting their schools and give to their county school board and to this department of public education their observations.

SCHOOL ATTENDANCE.

The average attendance of pupils, as will be shown by your report for the school year, is not what should be expected when it is considered that our school rooms are comfortable and comfortably furnished. Making proper allowances for the inaccurate method of computing the average attendance of pupils, and all reasonable excuses for absenteeism, the percentage is entirely too small when compared with the enrollment. Nothing is more

harmful to a proper classification of pupils, and to the advancement of the individual pupil, than unnecessary absence. As instruction in all school subjects is continuous every recitation becomes a link in the chain of knowledge about the subject in question, and this continuity is broken every day the pupil is absent. Parents have no more right to expect the school to give the pupil a proper mental equipment when such pupil absents himself one or two days in the week from school than has the farmer to expect an abundant crop when his field was but partially ploughed. Our patrons must be aroused to the necessity of sending their children to school every day if they would expect the best results from our system of education. I find, too, in my travels over the State that in spite of the bountiful provision which has been made for their education many boys and girls of school age either ignore this provision entirely or avail themselves of school advantages but poorly. When we remember that every community has a school house, and this presided over by a competent teacher and the use of text books free to the pupil, it would seem that every obstacle had been removed which stood between the child and the school opportunity. But this is not the case, for in many, many instances an indifferent parent or guardian interferes with this right of the child, which is inalienable. Maryland has been conservative in this matter, for while thirty or more States and Territories have passed compulsory educational laws, our State has been persuading the people to patronize the schools. Persuasion is perhaps better than force when it succeeds, but in spite of all that has been done to bring the public school within the reach of all, and the pleadings of our school officials and teachers to bring within its benign influence all children of school age, many have been denied this necessary preparation before the sphere of manhood and womanhood is reached. It has been a question for years whether the strong arm of the law should be invoked and give to all children what should be their birthright, an education of some sort, and when not obtained from other agencies to compel them to attend some public school at least eighty or ninety days of each school year.

The wisdom of such a law can hardly be questioned; for if I mistake not, of all the States which have enacted such a law not a single one has had it repealed. For several years past, whenever the question of a compulsory educational law came before our State associations for discussion, the sentiment of the members was largely favorable to the enactment of such a law for this State. It is better, perhaps, that the people have had ample time for its careful consideration, and that steps looking to the passage of such a law be taken by the people themselves through their legally elected representatives in the Legislature. The

efforts in past Legislatures to pass such a law were not those of our school officials, but in recognition of a popular demand which has grown with each succeeding year. A law of this kind, with no drastic features, would have the endorsement of the people generally and accomplish much, not only for the individual child, who would otherwise fail of an education, but for the interests of society and the State.

THE STATE NORMAL SCHOOL.

We all appreciate the good work done for the cause of public education by this institution, which has been a strong factor in elevating the teacher's profession. For many years the Maryland State Normal School was the only one in the State where student teachers could attend and receive special knowledge and training for the delicate duties of teaching. The graduates of this school have done very much to furnish loftier ideals of school work, and to create the impression which is fast becoming a conviction, that those who are to train the mind and mould character should have special training for such work. Our patrons have grown restless under the teaching of those whose ability to pass a teacher's examination and obtain a certificate was their chief if not only qualification for the school-room. They are dissatisfied with the results of such teaching and are ready to rise in their might where family, personal, church or political considerations stand in the way of the appointment of some person as teacher who has made preparation for the work. Because of this demand the number of trained teachers should be largely increased. It would seem that the time had come when our State is rich enough to make an appropriation for the maintenance of a State Normal School sufficiently large to obviate the necessity of having a large percentage of "pay students" in order to meet the running expenses of the school. If representation be increased it is more than probable that the institution will be taxed to its full capacity by young men and ladies who are anxious to enter the sphere of teaching.

When the Normal School was founded an examination for obtaining a second grade certificate was required for applicants who sought such scholarships. Many new studies have been added to the list for obtaining teachers' certificates, and it is now inexpedient for county school boards to follow this requirement. In order that the standard of the school may not be lowered or weakened it seems to me that your Board should have an examination for admission, and the school boards should be duly notified to this effect. The purposes of the Normal School will be thwarted, to some extent at least, if the teachers there be required to do much work which ought to have been done in our elementary schools.

In this hasty review of some of the educational problems confronting us, I have refrained from giving school statistics or discussion of subjects which will appear fully in your annual report. I felt some apprehension lest in the performance of the duties imposed upon me by the law creating the office of Superintendent that there might arise some differences of opinion between myself and county school officials, but am more than glad to say no such conditions have arisen, and our relations at all times have been entirely pleasant. Our county school officials are men of more than ordinary intelligence, of high character, and actuated by the highest purposes in their efforts to discharge their official duties. I wish to take this opportunity to extend to you, gentlemen, my sincere thanks for your many courtesies, and for the kindly advice you have so willingly given when sought by me. I am

Your obedient servant,

M. BATES STEPHENS,
State Superintendent of Education.

REPORTS

OF THE

SCHOOL COMMISSIONERS

OF

THE COUNTIES.

ALLEGANY COUNTY.

Cumberland, Md., October 14, 1901.

HON. E. B. PRETTYMAN,

Secretary State Board of Education, Baltimore, Md.

Dear Sir: I herewith submit the Annual Report of the Public Schools of Allegany county, Maryland, for the year ending July 31, 1901.

Very respectfully,

A. C. WILLISON,

*President Board of County School Commissioners.*JOHN T. WHITE, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1901.

	1901.	1900.
Number of school houses owned by the county, 101; rented, 4; total	105	104
Number of rooms occupied when attendance is largest.....	212	
Number of male teachers (principals), white, 25; colored, 1; total	26	
Number of female teachers (principals), white, 85; colored, 4; total	89	
Number of male teachers (assistants), white 1; colored, 0; total.....	1	
Number of female teachers (assistants), white, 110; colored, 3; total.	113	
Total, white, 221; colored, 8; total.	229	
Number of schools having out-buildings.	105	
Number of schools having sufficient blackboards.	105	
Number of schools having good furniture.....	105	
Number of terms schools were open—white, $3\frac{1}{2}$; colored, $3\frac{1}{2}$.		
Number of different pupils for the year—white, 10,137; col- ored, 352; total.	10,489	
Number of pupils in average attendance—white, 6,213; col- ored, 182; total.....	6,395	
Number of official school visits paid by examiner and assist- ant.....	427	

SUMMARY OF SCHOOL STATISTICS—Continued.

NUMBER OF PUPILS.

BALTIMORE COUNTY.

September 25, 1901.

PROF. E. B. PRETTYMAN,

*Secretary of the State Board of Education of Maryland,
Baltimore, Maryland.*

Dear Sir: In submitting the Annual Report of the Public Schools of Baltimore county for the year ending July 31, 1901, it may be well to review briefly the progress made during the year as well as to point out some hindrances to the most effective work possible.

MANUAL TRAINING SCHOOL.

The Manual Training School at Sparrows Point, established during the year, has developed more rapidly and accomplished more good than even its warmest friends anticipated.

Located in a large manufacturing center, the value of the training of hand and eye, together with the stimulation of mental growth and development in upwards of a hundred boys from the lowest to the highest grades, can scarcely be over-estimated.

Taking up the work as it does where the kindergarten leaves off, and carrying it through the various grades in paper, card-board and wood-work, the pupil acquires habits of accurate expression, attention to details and ability to express his ideas of form in a tangible manner, which will be of great value to him in after life, without interfering in the least with his regular school work—in fact, it adds a zest to his regular studies, for he sees the practical application in the manual work of many of the principles learned in school and often more or less dimly perceived, because of a lack of opportunity to apply principles already learned.

LOCAL INSTITUTES.

Five local teachers' meetings were held during the latter half of the scholastic year, of thirty or forty teachers each, in which the teachers and examiner met together for a day in a conveniently located school building to discuss the practical details of school work in a way that could have no place in a large body of teachers such as is assembled at the annual institute.

These meetings afforded an excellent opportunity for an interchange of ideas among the teachers, and, if no other good was accomplished, they bore witness to the patrons and school authorities that the teachers are earnest and progressive in their work.

TEACHERS' PROFESSIONAL LIBRARY.

Acting on the suggestion of State Superintendent Stephens, a Teachers' Professional Library was established during the year. On careful examination of the personal reports of the teachers, the number doing a considerable amount of professional reading is not nearly so large as should be expected. It is hoped that the establishment of the library will aid in promoting professional reading beyond that contained in educational journals, which all are doing.

ENGLISH.

The work in mathematics and memory studies in the schools is excellent, as a rule; but the work of pupils in English—in the ability to express thoughts clearly and accurately in good English, both oral and written—is generally defective in all grades.

It is hoped that this defect may be gradually remedied by oral and written reproduction of short stories, by the reproduction of what has been taught orally in geography, history and science, by stories written from pictures, etc., in the first two grades, by the continuation of this work in connection with the work outlined in the language book in succeeding grades, and by the teacher insisting on correct oral and written expression in all school work. The introduction of English classics in the upper grades, to be interpreted and read and used as a basis for composition work, in connection with the work in English and Literature, should prove both pleasant and profitable.

SCHOOL-ROOM DECORATION.

The general lack of school-room decoration, while really reproductions of the best in art are now within easy reach of all, is a lamentable condition of our schools, although some little progress in this line has been made in some of the schools, and is a source of delight to pupils, teachers and school officials.

Love of pictures is innate in children, and their taste needs only a little direction in order to distinguish the noble and good from the flashy and tawdry.

By a little care in selecting the subjects used for decorating purposes, so many phases of school life may be made a living reality to the child, and few things tend more to aid the teacher in raising the *morale* of the school, providing the pupils have first been interested in the subjects chosen, and

they are permitted to contribute their mite. For example, the school becomes interested in "Hiawatha," "The Children's Hour," and other poems by the same author himself. If this interest is well directed, the children will be delighted to bring a penny or two—none should be allowed to bring more—to have a well-framed portrait of Longfellow constantly before them in the school-room. This would be enough for one year. But if this requires too much outlay on the teacher's part, a perry picture of Longfellow, his birthplace, of his children, "Grave Alice and laughing Allegra, and Edith with golden hair," of the old arm chair presented to him by the school children of Cambridge, made from wood taken from "the spreading chesnut tree," all neatly mounted on dark card board and neatly framed in dark wood, will make a cheerful place on the wall of any building, however old it may be, whether rented or owned by the county.

What an opportunity for good influence is being lost on the future fathers and mothers, the home-makers of the coming generation! A taste for good pictures, good books, a genuine love of the beautiful in literature and art, how easily created, how cheaply gratified in this age, and with which no walk of life, no home, however humble, is common place.

Sincerely yours,

ALBERT S. COOK,

Examiner.

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1901.

	1901.	1900.
Number of school houses owned by the county, 147; rented, 38; total.	185	184

CALVERT COUNTY.

PRINCE FREDERICK MD., September 28, 1901.

PROF. E. B. PRETTYMAN,

*Secretary of the State Board of Education of Maryland,
Baltimore, Maryland.*

Dear Sir: I have the honor of forwarding to you my report of the public schools of Calvert county for the year ending July 31, 1901.

The necessary repairs and much needed furniture which the School Board was compelled to provide for, together with the reduced receipts from oyster licenses, made it necessary to close the schools two weeks before the end of the summer term.

Hoping this report may disclose a management of affairs by the Board satisfactory, I am,

Very respectfully,

J. BRISCOE BUNTING, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1901.

	1901.	1900.
Number of school houses owned by the county, 45; rented, 2; total.....	47	
Frame, 47; total.....	47	
Number of rooms occupied when attendance is largest.....	5

GARRETT COUNTY.

OAKLAND, MD., October 3, 1901.

HON. E. B. PRETTYMAN,

Secretary of the State Board of Education.

DEAR SIR—I have the honor of herewith submitting the annual report of the public schools of Garrett county for the year ending July 31, 1901.

The litigation over the School Board question in our county, at the beginning of the year, somewhat complicated matters for a time. But after the decision of the court, and by the magnanimous co-operation and assistance of our predecessors, we are able to report a very successful year in our schools.

Yours very respectfully,

E. A. BROWNING,

*Secretary and Examiner.*M. R. HAMILL, *President.*

REPORT OF MANUAL TRAINING SCHOOL OF

PRINCE GEORGE'S COUNTY, MD.,

FOR YEAR ENDING JULY 31, 1901.

RECEIPTS.

Received from State.....	\$1,500 00
Received from Board School Commissioners	40 60
Total	\$1,540 60

DISBURSEMENTS.

Paid for furnishing and fitting up rooms.	\$463 34
Teachers' salary.....	424 58
Incidental expenses.....	313 57
July 31, 1901, balance.....	339 11
	\$1,540 60

The school has been in successful operation since the 27th of last September, with an average of over 40 pupils, and has, in our judgment, been of solid advantage to the youths of our county.

Respectfully submitted,

THOS. S. STONE, *Secretary*

WHITE SCHOOLS.

QUEEN ANNE'S COUNTY.

CENTREVILLE, MD., October 17, 1901.

PROF. E. B. PRETTYMAN,

Secretary State Board of Education.

DEAR SIR—I beg herewith to submit the annual report of the Public Schools of Queen Anne's County, Md., for the year ending July 31, 1901.

The efficiency of the public school system in this county has been added to, during the present year, by the erection of a high school at Centreville. The teachers, as a body, are alive to the interests of the schools and are doing good work. I am

Very truly yours,

L. L. BEATTY, *Examiner.*

UNIFORM COURSE OF STUDY

—FOR—

Elementary and High Schools
OF MARYLAND.

Adopted by the State Board of Education July 2, 1901.

SUBMITTED BY

M. BATES STEPHENS,

State Superintendent of Public Education.

FIRST YEAR GRADE.

1. Reading.	4. Number.
2. Spelling.	5 Writing.
3. Language.	
LANGUAGE—LITERATURE.	MATHEMATICS.
<i>Group I.</i>	<i>Group II.</i>
a. Reading.	a. Number Work.
b. Spelling.	b. Form and Geometrical Exercises.
c. Language.	
d. Writing.	
e. Memory Work.	

FIRST HALF YEAR.

a. Use chart and blackboard. Begin with words. Phonics. Words in sentences from blackboard. Easy lessons from First Reader. b-d. Copying words from blackboard and slips. Teach forms of letters. Copying sentences. c. Reading or telling short stories to pupils. Oral reproduction of stories told or read. Copy sentences. e. Learning and reciting of short pieces.	a. Combinations of numbers to ten. Use objects. Teach in order the facts of the numbers 2, 4, 8, 3, 6, 9, 5, 10, 7 Use terms one-half and one-fourth. Teach pint and quart. Original stories. b. Comparison of blocks in size. Develop in connection with Group V—b—the meaning of sphere, cube and cylinder, surface and edge. Length of edges.
---	---

SECOND HALF YEAR.

a. Lessons from First Readers. Analysis and synthesis of words by sound and letter. Phonics. First Reader completed. Use another First Reader or suitable matter for supplementary reading. b-d. Copying words and sentences. Teaching correct forms of single letters continued. Spell all the words learned. Write words from dictation. c. Write sentences. Teach pupils to write their name; school; town; father's (Mr.) name; mother's (Mrs.) name; teacher's name. Oral and written reproduction of what has been told. e. Learning and reciting of short pieces continued.	a. Combinations of numbers to twenty with and without objects. Teach addition, subtraction, multiplication, and division. Teach at first with objects, afterward abstractly, and finally teach the figures. Teach dozen, quart, gallon, dime, foot, inch. Teach fractional parts of numbers as far as tenths. Apply measurements in practical problems. Original problems. b. Comparison of length of edges of inch cube with edges of other blocks.
---	--

FIRST YEAR GRADE.

SCIENCE.

CONDUCT.

ART.

*Group III.**Group IV.**Group V.*

a. Nature Study.

a. Morals and Manners.

a. Vocal Music.

b. Information Reading.

b. Manual Training.

c. Physical Culture.

FIRST HALF YEAR.

a. Recognition of common plants and trees

Observe flesh-eating animals (dog, cat) for habits and adaptation of parts to habits.

Pictures of unfamiliar animals for comparison.

Uses of plants and their parts to man.

Uses of animals to man.

Animal productions.

b. Suitable stories and selections.

a. "Lessons in Morals and Manners" as laid down in White's School

Management, recommended. These thirty-two suggestive topics are carefully outlined and well adapted to encourage moral training. Some other outline, equally good, may be used. This suggestion applies to all grades.

a. Breathing and phonic exercises. Songs selected from standard books. Daily exercises in singing.

b. Kindergarten occupations. Imaginative drawing.

Modelling { Sphere.
Cube.
Cylinder.
(in clay)

Study and draw common objects resembling models.

c. Follow the plan and suggestions of approved work on physical culture for all grade work.

SECOND HALF YEAR.

a. Recognition of common rocks.

Buds observed.

Recognition of common plants and trees.

Observe and name qualities as color, size, form, number, surface.

Teach uses of rocks to man.

Mineral productions.

Vegetable productions.

b. Suitable selections.

a. White's 'Lessons in Morals and Manners' continued.

a. Same as first half-year.

b. Kindergarten occupations. Imaginative drawing.

Modelling { Hemisphere.
Square prism.
Triangular. "
(in clay)

Draw pictures, views, and patterns of models.

With colors (black and white) draw fruits, leaves, flowers.

*Illustration of simple stories:

(1) A picture of a boy sailing a kite.

(2) Blowing soap bubbles.

(3) Out in the rain, etc.

c. Note suggestion above.

*To the Teacher: Use only three primary colors—yellow, red and blue. Colored crayons are better than water colors for lower grades.

SECOND YEAR GRADE.

1. Reading.	4. Number.
2. Spelling.	5. Writing.
3. Language.	6. Biography.
LANGUAGE—LITERATURE.	MATHEMATICS.
<i>Group I.</i>	<i>Group II.</i>
a. Reading. b. Spelling. c. Language. d. Writing. e. Memory Work.	a. Number Work. b. Form and Geometrical Exercises.

FIRST HALF YEAR.

<p>a. Difficult selections from First Readers. Phonic drill continued. Analysis and synthesis of words continued. Easy lessons from Second Reader. Simple matter for supplementary and sight reading.</p> <p>b. Spell all words occurring in reading lessons. Written spelling lessons from dictation.</p> <p>c. Oral and written compositions (reproductions, etc.) daily. Common abbreviations. Use of capitals. Use of period and interrogation mark.</p> <p>d. Teach correct forms of single letters. Writing from dictation. Use pencil and tablet.</p> <p>e. Memory work reviewed and continued.</p>	<p>a. Numbers from 1 to 100. Oral: Count additively and subtractively by first three numbers, beginning with one, two, etc., for each of numbers used. Combinations of tens with numbers less than ten. Learn first two lines Multiplication Table. Written: Make and solve problems involving numbers learned. All combinations to fifty; no added or subtracted number or multiplier or divisor greater than ten. Application to familiar weights and measures. Teach fractional parts of familiar numbers. Solve simple problems, applying the knowledge gained in the reading and the oral number work.</p> <p>b. Areas of inch cube and of two-inch cube. Perimeters of inch cube and two-inch cube.</p>
--	---

SECOND HALF YEAR.

<p>a. Lessons from Second Readers. Easy matter for supplementary and sight reading, continued. Phonic drill continued.</p> <p>b. Spelling of words common to reading and language lessons. Ordinary use of capital letters, abbreviations, period, interrogation and exclamation marks, continued.</p> <p>c. Composition and dictation exercises Oral and written reproductions of stories told or read. Descriptions of objects.</p> <p>d. Copying and writing from dictation, continued. Practice upon forms of letters. Introduce Copy Book No. 1.</p>	<p>a. Numbers from 1 to 100. Oral: Count additively and subtractively by first five numbers as suggested above. Learn first five lines of the Multiplication Table. Written: Make and solve problems involving numbers learned, continued. Application to familiar weights and measures and the teaching of fractional parts of familiar numbers, continued. Have pupils make and solve problems involving numbers learned. Drill for accuracy and rapidity. All combinations; no added or subtracted number or multiplier or divisor greater than ten. Original problems.</p> <p>b. Comparison of surfaces of prisms.</p>
---	--

SECOND YEAR GRADE.

7. General Exercises....

Vocal Music. Nature Study. Oral Physiology and Hygiene. Morals and Manners. Manual Training.... } Physical Culture. }	}	Drawing. Scissors Work.
--	---	----------------------------

SCIENCE.

CONDUCT.

ART.

Group III.

- a. Nature Study.
(Oral Geography.)
- b. Information Reading.
- c. Physiology and Hygiene.

Group IV.

- a. Morals and Manners.
- b. Biographical Stories.

Group V.

- a. Vocal Music.
- b. Manual Training.
(Drawing.)
- c. Physical Culture.

FIRST HALF YEAR.

a. Observation of common plants and trees continued. Observe grass-eating animals (cow, horse, sheep,) for habits and adaptation of parts to habits.

Use pictures of unfamiliar animals of same class for comparison.

Useful animal and vegetable productions.

b. Suitable selections.

c. Parts of body-movement, use and care of each part. Teach parts of head. Care of eyes, teeth, hair, face, hands, feet, nails.

Compare parts of body with bodies of animals studied.

a. White's "Lessons in Morals and Manners" continued
 b. Telling of carefully selected stories suitable to the capacity of the children and to the season. Select also with reference to what is done in nature study work.

given in primary grades. If the course for drawing in graded schools be used one book of the set should be used in each grade, beginning with the Third grade. Where drawing books are used follow directions given in the Manual. Pupils should be supplied with suitable materials. In rooms where there are several grades drawing and writing can come on alternate days.

a. As in first year.
 b. *Memory Drawing. Drawing from nature simple grasses and flowers. Study of pictures for story. Clay modelling. Review models studied in first year. Study ellipsoid, ovoid, cone.
 Cutting and making designs of colored paper.

c. Note suggestion for first grade. *To the Teacher: The Prang primary course in art education, or some system the equal of it, should be followed by the teacher in work

SECOND HALF YEAR.

a. Observe bean and pea. Plant several kinds of seed for observation and comparison.

Naming common plants and trees of neighborhood, and also cultivated plants.

Plants and parts used for food and clothing. Use of seeds. Forms of water, winds, direction and distance.

Direction and distance applied to familiar bodies of land and water.

b. Suitable selections.

c. Simple lessons on eating, drinking, breathing and sleeping.

Use of the bones. How injured.

Effect of tobacco and alcohol.

a. White's "Lessons in Morals and Manners" continued
 b. Stories prescribed for first half year continued.

a. As in first year.

b. Memory drawing.

Study solids and build with them so as to form (1) single typical objects; (2) churches, &c., from which pupils can afterward draw.

Illustrate: (1) fruits; (2) vegetables; (3) still life; (4) landscape.

*Paint trees from nature. Work in mass with no attempt at detail.

Clay modelling: Cone, square pyramid, and vase forms.

Cutting and making designs of colored paper.

c. Note suggestions for first grade.

*To the Teacher: After drawing lesson it is a good plan to have pupil draw the same object on board from memory.

THIRD YEAR GRADE.

- | | |
|--------------|----------------|
| 1. Reading. | 4. Arithmetic. |
| 2. Spelling. | 5. Writing. |
| 3. Language. | 6. Biography. |

LANGUAGE—LITERATURE.	MATHEMATICS.
<i>Group I.</i>	<i>Group II.</i>
a. Reading.	a. Arithmetic.
b. Spelling.	(Number Work.)
c. Language.	b. Form and Geometrical Exercises.
d. Writing.	
e. Memory Work.	

FIRST HALF YEAR.

a. Second Reader reviewed. Daily practice in sight reading. Test pupils' ability to get thought from printed page. Easy lessons from Third Reader. Books and selections of corresponding grade to Third Reader.	a. Numbers to one thousand. Addition and subtraction with and without objects, using all the integers. Multiplication and Division with and without objects. Learn Multiplication Table. Drill thoroughly in fundamental operations. Aim at rapidity and accuracy. Use suitable problems and require a full and correct statement of each problem. Original problems. Fractional parts of numbers. Application of weights and measures.
b. Special attention to correct words and correct forms of words. Spell orally and in writing all words of reading exercises.	b. Comparison of surfaces of cubes and prisms with surface of inch cube.
c. Copy portions of reading lessons. Daily composition and dictation exercises. Stories reproduced. Base some work on Æsop's Fables.	
d. Copy Book No. 2.	
e. Memory work continued. Easy quotations.	

SECOND HALF YEAR.

a. Lessons from Third Reader. Daily practice in sight reading continued. Supplementary reading. Continue tests of ability of pupils to get thought from the reading lessons. Books and selections of corresponding grade to Third Reader.	a. Numbers to one thousand. All operations. Continue applications in common weights and measures. Original problems. Daily oral exercises. Aim at rapidity and accuracy. Use an Elementary Arithmetic.
b. Attention to correct words and correct forms of words. Written exercises, using new words of reading lesson. Give lessons from spelling book. Use spelling blanks.	To the Teacher: In teaching oral or mental arithmetic a text book on the subject must be in the hands of pupils of all grades to and including the sixth.
c. Punctuation and use of capitals continued. Composition lessons from elementary language book. Reproduction exercises. Attention to clearness and originality. Æsop's Fables.	b. Measurements of familiar surfaces and practical application.
d. Copy Book No. 2. Copy portions of reading exercises.	
e. Memory gems.	

THIRD YEAR GRADE.

7. General Exercises....	Vocal Music.	{ Drawing. Construction Work in Paper Folding. Scissors Work.
	Nature Study.	
	Oral Physiology and Hygiene.	
	Oral Geography.	
	Manual Training.....	
	Morals and Manners.	
	Physical Culture.	

SCIENCE.

CONDUCT.

ART.

Group III.

- Nature Study.
- Oral Geography.
- Information Reading.
- Oral Physiology and Hygiene.

Group IV.

- Morals and Manners.
- Short biographical and historical stories.

Group V.

- Vocal Music.
- Manual Training.
- Physical Culture.

FIRST HALF YEAR.

a. Continue observation and study of plants and trees of the neighborhood.

Observe and study minerals and rocks.

Encourage pupils to bring specimens for school cabinet.

Study uses of grasses and seeds.

b. Lesson on natural divisions of land and water; teach with globe general features of land and water surfaces; general facts of climate, productions, people, countries and cities. Model in sand or crayon islands, promontories, peninsulas, volcanoes. Take imaginary journeys. Observe geographical pictures.

c Suitable selections.

d. Talks on ventilation, colds, draughts. Muscles—their shape and uses. Best kinds of exercise.

Wholesome and unwholesome drinks.

a. White's "Lessons in Morals and Manners" continued.

b. Short sketches of American statesmen, soldiers, naval heroes and authors.

Classical myths.
Stories of Egypt, Assyria, Judea and Babylon.

a. As in first year.

b. Building up objects with use of straight and curved lines.

Complete ten pages of the drawing book.

Free drawing of plants and other common objects.

Clay modelling: Review work of former grade, requiring greater exactness.

Exercises in paper folding.

c. Note suggestions for first grade.

SECOND HALF YEAR.

a. Simple lessons on qualities of air and water.

Study of birds.

b. Alternate lessons read by teacher from text on elementary geography and reproduced by pupil, with oral lessons in local geography.

Soil formation.

Surface, soil, climate and productions of locality.

Draw maps of school grounds and school district.

d. Simple lessons on indigestion and circulation.

Effects of tobacco and alcohol on the human system.

Talks on respiration and ventilation.

a. White's "Lessons in Morals and Manners" continued.

b. Stories and sketches for first half year continued.

a. As in first year grade.

b. Designing in black and white simple objects in pencil and colored crayons. Animals with brush and ink.

Complete drawing book begun first half year.

Blackboard drawing: Related curves and straight lines.

Greater accuracy required in clay modelling.

Exercises in paper folding continued.

c. Note suggestions for first grade.

FOURTH YEAR GRADE.

FIRST HALF YEAR.

- a. Third Readers reviewed.
Books and selections of corresponding grade to Third Reader
Easy lessons for sight reading.
Supplementary reading.
- b. Daily dictation exercises.
Teach use of diacritical marks
Use spelling blanks for most spelling lessons
Use a modern spelling book.
Definitions of new words.
- c. Continue lessons of Language book, with supplementary exercises.*
Special attention to correctness of spelling, punctuation, use of capitals, choice and forms of words, clearness and conciseness of expression
- d. Copy book suitable to grade of pupil. Special instruction to pupils who need it.
- e. Memory gems continued.
*Correlate Group IV. (c) with work in language.

- a. Integers to one million. Addition, subtraction, multiplication and division.
Fractions: Thirds, sixths, twelfths.
Simple business transactions.
Common weights and measures.
Constant drill for accuracy and rapidity.
Solution of concrete problems.
Oral solutions.
Easy problems in Denominate Numbers.
- b. Angles and areas of rectangles.
Areas of parallelograms.
Volume of a cube and a parallelepiped.

SECOND HALF YEAR.

- a. Reading matter, adapted to the interest and capacity of pupils.
Frequent test of ability of pupils to gain thought rapidly from the printed page.
Sight reading continued.
- b. Continue the work as suggested for first half year.
- c. As in first half of year.
- d. As in first half of year.
- e. Memory gems continued.

- a. Integers unlimited.
Teach common fractions to twelfths and decimals to thousandths.
Require pupils to originate and give written analysis of one or two problems daily.
Drill in subject of relations of quantity and of numbers.
Simple problems in Common Fractions, Decimals, Weights and Measures.
Oral work continued.
Combine four fundamental principles for rapidity and accuracy.
- b. Areas of triangles.
Practical application in finding areas.
Volume of a pyramid.

FOURTH YEAR GRADE.

9. General Exercises	Vocal Music.	{ Drawing. Scissors Work. Cardboard Construction Work.
	Elementary Science.	
	Morals and Manners.	
	Manual Training. . . .	
	Physical Culture	

SCIENCE.

CONDUCT.

ART.

Group III.

- Elementary Science.
- Geography.
- Information Reading.
- Physiology.

Group IV.

- Morals and Manners.
- History.
- Biographical Sketches.

Group V.

- Vocal Music.
- Manual Training.
- Physical Culture.

FIRST HALF YEAR.

a. Explain: Dew; frost; clouds; vapor; air; water; etc.
Plant and its parts. Parts of leaves and flowers.

b. Teach elementary geography.
Map drawing of county and State.

Sand or clay modelling. Continue use of globe in teaching general features of land and water.

Surface, general facts of climate, productions, people, countries and cities.

c. Suitable selections.

d. The bony system: Names, number and location of bones. Composition and structure of bones. Simple lessons on the muscles.

Alcoholic drinks, stimulants and narcotics.

Cleanliness in dress and person.

Necessity of bathing; food and drink.

a. White's "Lessons in Morals and Manners" continued.

b. Collect pictures, for school room, of writers, statesmen, soldiers, sailors and other great personages. Short talks by the teacher should be reproduced orally or in writing by the pupils.

Collect pictures pertaining to the history of Maryland.

Sketches of Maryland's greatest men.

c. Continue work of third year.

a. As in first year with such additional instruction as may be necessary.

b. Finish first ten pages of drawing book.

More careful study of single objects, found in school room, with pencil.

Harmonious arrangement of one color with black, white or gray.

Cardboard construction work.

Geometric forms of type solids, * including those given in II (b).

c. Note suggestion for first year grade.

* Follow regular systematic and graded course of objects.

SECOND HALF YEAR.

a. Kinds of fruit.

Lessons on kinds of useful roots. Form, structure and use of stems. Properties of minerals and building stones.

Make a labelled collection of stones used in building; samples of soils; dry fruits and seeds; larvæ and cocoons.

Have oral and written stories of observations.

b. Elementary Geography lessons with supplementary work. Sand and clay modelling continued.

Careful study of relief maps.

Map drawing continued.

c. Suitable selections.

d. Simple lessons on respiration, circulation and nervous system. Importance of strong body. The five senses. Muscles and joints. How to eat. Care of eyes.

a. White's "Lessons in Morals and Manners" continued.

b. Written reproductions of talks by teacher on following topics: Discovery of America; early settlements; French and Indian wars; causes of the Revolution; the Revolutionary war; war of 1812; Mexican war; Civil war; settlement of Maryland; Lord Baltimore; Maryland's part in the Revolutionary war; Annapolis; General Smallwood; the B. & O. R. R.

Review all topics and fill in as many additional facts as circumstances will allow.

c. Biographical sketches continued.

a. As for first half year.

b. Finish drawing book begun in first half year.

Continue study of single objects.

Use of floral elements in borders or surface patterns in colors.

Cardboard construction work.

Geometric form of type solids continued as suggested.

c. Note suggestion for first year grade.

FIFTH YEAR GRADE.

1. Reading.	5. Writing.
2. Spelling.	6. Physiology.
3. Language and Grammar.	7. History.
4. Arithmetic.	8. Geography.
LANGUAGE—LITERATURE.	MATHEMATICS.
<i>Group I.</i>	<i>Group II.</i>
a. Reading.	a. Arithmetic.
b. Spelling.	b. Form and Geometrical Exercises.
c. Grammar and Composition.	
d. Writing.	
e. Memory Work.	

FIRST HALF YEAR.

a. Reading or literature adapted to the interest and capacity of the pupil.

b. Continue lessons of spelling book and spelling blanks of former grade. Supplement with lists of words from other text books in use. Give especial attention to proper names. Mainly written exercises. Diacritical marks taught.

c. Language book reviewed. Originate considerable work. Explain various terms of technical grammar.

d. Copy book suited to grade.

e. Memory gems continued.

a. More difficult problems in addition, subtraction, multiplication and division of common fractions.

Reduce mixed numbers to fractions and fractions to mixed numbers. Avoid difficult problems in complex and compound fractions.

Factoring and cancellation. Decimal fractions: all operations unlimited.

Oral solutions for accuracy and rapidity continued. Examples from different text books. Original problems.

Applications in business transactions.

b. Kinds of polygons. Areas of polygons.

SECOND HALF YEAR.

a. Same as for first half year.

b. Spelling book completed. Follow suggestions for first half year.

c. Text books on technical (Elementary) grammar begun. Language exercises continued.

d. Copy book adapted to needs of the pupil. In the writing exercises for all grades special attention should be given to position, pen holding, movement, formation of capitals and small letters.

e. Memory gems continued.

a. Review in common fractions.

Simple problems in Denominate Numbers. Teach tables for several measures. Make pupils familiar with the common units of measurement.

Frequent reviews. Many oral exercises for accuracy and rapidity.

Percentage: Teach that per cent. means hundredths; that $\frac{1}{2}$ =50 %, $\frac{1}{3}$ =33 $\frac{1}{3}$ %, $\frac{1}{4}$ =25 %, 1.5=20 %. Give many simple problems.

Have pupils originate problems. Applications in business transactions.

Simple problems in interest.

b. Areas of surfaces of cube and prism.

FIFTH YEAR GRADE.

- Information Reading.
- Physiology.

Group IV.

- Morals and Manners.
- History.
- Biographical Sketches.

Group V.

- Vocal Music.
- Manual Training.
- Physical Culture.

FIRST HALF YEAR.

a. Study kinds and habits of birds.
Buds and barks of trees.
Drawings of plants at different stages of growth.
Explain: Barometer; thermometer, pump, steam engine.
Motion and pressure in solids, water and air.

b. Elements of geography reviewed
Special lessons on mountain ranges and slopes, drainage and soil.

Large book of series begun.
Map drawing continued.
Clay modelling continued.
Teach geography of Maryland.

c. Suitable selections.

d. Text book prescribed by legislative enactment begun.

a. White's "Lessons in Morals and Manners" continued.

b. History of U. S.: Consecutive reading and study of text relating to explorations and discoveries; early colonies of North America; early Indian wars; life in colonial time, including colonial wars with France and Spain.

Continue sketches of Maryland's greatest men and add to the collection of pictures.

Stories from Grecian history.

c. Sketches of distinguished Americans.

Keep adding to collection of pictures and continue oral and written descriptions.

a. Follow former suggestions.

b. Drawing in mass of animals and children in interesting attitudes. Ten pages of Drawing Book.

Introduce water colors and have pupils paint flowers and still life from nature.

Whittling—wood.

c. Note suggestions for first year grade.

SECOND HALF YEAR.

a. Continue study of kinds and habits of birds.

Study of changes in heat on water and air. Apply to phenomena of seasons. Changes in position of sun.

Relation of known insects to man as useful or injurious.

b Book introduced for first half year continued.

Special lessons on climate and productions.

Map drawing continued.

Clay modelling.

c. Suitable selections.

d. Text books with special reference to effects of alcohol on human system completed. This is the text book begun in first half year.

a White's "Lessons in Morals and Manners" continued.

b. Consecutive reading and study of United States History to Monroe's administration.

Supplementary lessons on history of Maryland.

c. Work of first half year continued.

a. Former suggestions followed.

b. Free hand drawing in any medium of plants, fruits and simple spherical and cylindrical objects.

Drawing book begun first half year completed.

Exercises in whittling—wood.

Working drawings (regular graded course of work).

c. Note suggestion for first year grade.

SIXTH YEAR GRADE.

1. Reading.	5. Writing.
2. Etymology.	6. History.
3. English Grammar.	7. Geography.
4. Arithmetic.	8. Civics.
LANGUAGE—LITERATURE.	MATHEMATICS.
<i>Group I.</i>	<i>Group II.</i>
a. Reading—Literature.	a. Arithmetic.
b. Orthography—Etymology.	b. Form and Geometrical Exercises.
c. English Grammar.	
d. Writing.	
e. Memory Work.	

FIRST HALF YEAR.

a. Reading-Literature suited to the interest and capacity of pupils. American or British classics.	a. Denominate numbers; All operations unlimited except obsolete denominate quantities which should be omitted. Practical problems in measurements. Lessons on percentage continued. Lessons in mental arithmetic for accuracy and rapidity. To the teacher: "Thought main thing in arithmetic." Pupils must see through definitions the things defined Pupils must have clear understanding of problems. In all arithmetic classes give many concrete problems.
b. Lists of words from different text books. Continue drill in diacritical marks. Frequent reference to dictionary. Begin text book on Etymology.	b. Solid contents of rectangular prism.
c. Continue work of elementary grammar. Special drill on parts of speech; declensions and conjugations. Supplementary language work.	
d. Same suggestions as for previous grade. Introduce various business forms.	
e. Memory gems continued.	

SECOND HALF YEAR.

a. Same as for first half year.	a. Original problems in common fractions, decimals, denominate numbers and percentage. Continue concrete problems. Teach simple interest, partial payments, bank discount. Have pupils originate problems and submit written statements. Business transactions and accounts. Simple applications of suggested topics.
b. Continue work as laid down for first half year.	b. Measurements of circles.
c. Complete elementary grammar. Analysis, parsing and false syntax. Continue supplementary language work.	
d. Continue work of first half year.	
e. Memory gems continued.	

SIXTH YEAR GRADE.

b. Manual Training.
c. Physical Culture

FIRST HALF YEAR.

a. Grouping of plants. Study of trees continued. New specimens for collection properly labelled. Study of common metals and their ores. Grouping of birds as to habits: perchers, scratchers and swimmers. Study combined effects of heat and gravity on water and air. Elements of agriculture.	a. White's "Lessons in Morals and Manners" continued. b. Consecutive reading of United States History and study of text including all topics to close of Civil war. History of Maryland (from text book) begun. Stories from Roman history. c. Lessons on following topics: Beginnings of citizenship; constitution of United States; rights and duties of citizens; departments of government; the National Senate; House of Representatives; civil service reform; wealth, money; tariff duties; treatment of crime. If text book is used follow suggestions of it rather than of above outline.	a. Follow former suggestions. b. Analysis of leaves and flowers for color schemes. Original designing. Object study. Using water colors, paint flowers and still life from nature. (Complete first ten pages of D. book.) Exercises in stamping and indenting. Decorating objects made in whittling course. c. Follow former suggestion.
--	---	---

SECOND HALF YEAR.

a. Continue work suggested for first half year. Study absorption, transfer and radiation of heat by solids and liquids. Causes of eclipses of sun and moon. Elements of agriculture. b. Complete the text book of previous year. Special lessons on winds and ocean currents, climate and rainfall, commerce, productions and government. Map drawing continued. c. Suitable selections.	a. White's "Lessons in Morals and Manners" continued. b. Complete text of U. S. History. Continue study of History of Maryland. Talks on National and State constitutions. Frequent reviews. c. If no text book is in pupils' hands use following topics for lessons: Powers and duties of Congress; causes of poverty; corporations; bankruptcy; arbitration; capital punishment; elective franchise; State government, its officers, and how chosen; Monroe doctrine; maritime rights; laws of supply and demand; capital and labor.	a. Follow former suggestions. b. Drawing in any medium of plants and common objects. (Complete the drawing book.) Clay modelling, still life, original designing and object study continued. Exercises in stamping and indenting; also decorating objects made in whittling course continued. c. Follow former suggestions.

b. Orthography—Etymology.	b. Form and Geometrical Exercises.
c. Grammar and Composition.	
d. Writing { Business Forms Book-Keeping.	
e. Memory Work.	

FIRST HALF YEAR.

a. Reading—Literature suited to the interest and capacity of pupils. American or British classics. Begin some definite work in literature by teaching literary wholes.	a. Brief reviews of important topics studied previous year. Teach following topics: Present worth; true discount; compound interest; stocks; insurance; taxes; exchange; equation of payments; averaging accounts; ratio; simple proportion; partnership. Miscellaneous and test problems. Mental exercises for accuracy and rapidity. Original problems.
b. Continue lessons in Etymology. Have pupils become quite familiar with use of dictionary.	
c. Brief review of elementary grammar. Analysis, parsing, false syntax. Original compositions.	b. Measurements and problems relating to angles.
d. Drill in business forms. Simple form of accounts. Explanations of books used in system of bookkeeping. Blackboard exercises.	
e. Memory gems continued.	

SECOND HALF YEAR.

a. Same as for first half year.	a. Teach following topics: Involution and evolution; square root; progression; annuities; mensuration and metric system. Drill for accuracy and rapidity. To the teacher: The practical part of arithmetic should be completed in this grade. Omit: Compound proportion; cube root (except such as can be done by inspection); greater part of commercial arithmetic; examples not easily made intelligible to pupils in profit and loss; bank discount; simple and compound interest. Energies of pupils should not be exhausted by too difficult problems which are often mere manipulation of figures.
b. Etymology completed.	b. Areas of surfaces of pyramid and cone. Solid contents of cylinder.
c. Original compositions.	
d. Same as for first half year.	
e. Memory gems continued.

c. Information Reading.	c. Civics.	c. Physical Culture.

FIRST HALF YEAR.

a. Study composite family, or grasses and grains. Study of coal series and candle flame products. Poisonous plants and trees. Lessons on light, sound and electricity. Elements of agriculture.	a. White's "Lessons in Morals and Manners" continued.	a. Follow former suggestions.
b. Introduce book which treats the subject of physiology, according to modern rather than old time methods, "a text which shall unify the study of the parts and of the functions of the human organism, by the application of approved pedagogical and scientific principles."	b. History of United States reviewed. Study the texts of the National and State constitutions. To the teacher: All geography for this grade taught in connection with study of history.	b. Plant forms in appropriate medium Complete ten pages of book of the drawing course. Original designing. Still life. Sloyd—Benchwork.
c. Suitable selections.	c. Lessons from text book on Civil government.	c. Note suggestions for first year grade.

SECOND HALF YEAR.

a. Composition of air, water and various foods. Some principles of acoustics. Study rose family. Study typical marine animals. Lessons on heat. Elements of agriculture.	a. White's "Lessons in Morals and Manners" continued.	a. Follow former suggestions.
b. Continue lessons of physiology and complete same.	b. Review history of Maryland and also United States history. Review National and State constitutions.	b. Drawing: Original designing. Still life and ornament. Complete drawing book begun in first half year. Sloyd—Benchwork (working drawings).
c. Suitable selections.	c. Finish lessons of text book on Civil government.	c. Note suggestion for first half year grade.
